

**FS 2010-10  
CARE PROGRAM  
Section 2**

SECTION					PAGE	STAKEHOLDER COMMENT	KDOA RESPONSE
1	2.1	4	D.1	7 of 16	On page 7, D. I am thinking a referral to the AAA should be changed to a referral to a CME. If the person is eligible for Medicaid, they could choose to work with an independent agency rather than a AAA.	Change has been made to reflect AAA and/or CME as case management may or may not be Medicaid	
2	2.1	2		2 of 16	"Intellectual disability" - The CARE forms will need to be updated to include this new language (PASRR section).	CARE forms will be updated to reflect "intellectual disability" as new forms are printed	
3	2.1	2		2 of 16	"Intermediate care facility for the mentally retarded" - To be consistent with the new language in the draft policy, should KDOA consider the use of the term "mentally retarded" be changed to "intellectual disabled" when referencing the 2nd definition on this page?	This definition comes from KSA 39-923 and was included in Definitions as it has not yet been changed to reflect the new terminology	
4	2.1	4	E	7 of 16	"If the individual has a legal guardian and a referral for a level II assessment has been made, the AAA shall notify the legal guardian, in writing, at the time of the referral." - While this is a current policy, it appears that if AAA knows of a legal guardian, the guardian is required for both the level I and level II assessments. Why is there a policy clarifying this for level II assessments, especially if the guardian was included with the level I assessment? It seems the wording in the policy for the guardian involvement for the level I (page 5 2.1.4.C.4) is less formal and is grouped with "family and other caregivers" who MAY have input to the assessment, but are not REQUIRED by law. We believe the required inclusion of a legal guardian should be the same standard for both level I and level II assessments.	Change has been made to Sec. 2.1.4.C to clarify policy requirements for notification of guardian for Level I assessments	
5	2.1	4	C.8	6 of 16	This comment is in reference to Page 6 of the draft #8 A-it states that the customer shall be given the original care certificate. Are we saying that we are to give the white copy to them and not the yellow carbon?	Change has been made	
6	2.1	1	Intro	1 of 16	NF CARE Assessors should only complete the first two sections of the assessment.	Change has been made	
7	2.1	3	D.1	3 of 16	Title for KDOA CARE Senior Manager changed to Director of Transitions and CARE	Change has been made	
8	2.1	4	G.2	8 of 16	Need to add instructions for notation from physician on admission orders that it was an emergency admission.	Change has been made
