# Osawatomie State Hospital: CMS Recertification

---

- Week of March 27 Secretary met with members of the Kansas congressional delegation and CMS staff in Washington to discuss OSH recertification.
- Because Osawatomie State Hospital has been ready for a recertification survey since the end of August, 2016, Secretary Keck has instructed hospital management to contact The Joint Commission and request a certification survey from that organization.
- In some cases, CMS has accepted a survey by The Joint Commission as the first survey in the two-survey recertification process.
- The agency has also submitted a proposed systems improvement agreement to CMS that would allow the hospital to regain certified status more quickly.

# Osawatomie State Hospital Changes Since 2014

---

## Nursing Services

- A concerted effort to recruit new and retain existing Registered Nurses

## Safety & Security

- Additional Security Officers are now on-site 24/7 to assist with safety and security of patients and staff.

Jan	12
Feb	16
Mar	17

# Larned State Hospital (LSH)

---

Larned State Hospital operates 3 distinctly different treatment programs.

- Psychiatric Services Program (PSP)
- State Security Program (SSP)
- Sexual Predator Treatment Program (SPTP)

# Larned State Hospital (LSH)

---

- *The Psychiatric Services Program (PSP)* serves voluntary as well as civilly committed adults with mental illness.
- Patients enter the program after having been screened by qualified mental health professionals from one of the mental health centers in Central and Western Kansas, or are referred under an order of evaluation from a judge.
- Budgeted for 90 beds.

# Larned State Hospital (LSH)

---

- *The State Security Program* (SSP), serves male and female adult mentally ill forensic populations from the entire state of Kansas, which are admitted through specific forensic statutes or transferred from the Kansas Department of Corrections (KDOC) for acute or secure residential treatment. This program provides a secure setting for forensic evaluations and psychiatric inpatient treatment.
  - The Security Behavior Unit (SBU), serves a group of males who are civilly - rather than criminally - committed and who pose a very high risk of dangerousness. SBU provides services to both OSH and LSH.
- Budgeted for 220 beds.

# Larned State Hospital (LSH)

---

The Sexual Predator Treatment Program (SPTP) was established by a 1994 statute that provides for the civil commitment of persons identified by the law as sexually violent predators. SPTP has a dual mission:

Provide for the safety of Kansas citizens by establishing a secure environment in which persons identified as sexually violent predators can reside. Kansas statute says the goal of the program is “No new victims.”

Offer treatment with the aim of reducing their risk for re-offending allowing motivated persons who complete treatment to return to society.
