

ENROLLMENT FOR INITIAL MEDICARE CERTIFICATION

Nursing facilities must be Medicaid certified prior to receiving approval to participate in the Medicare program.

- All initial Medicare certification surveys have been determined by the Centers for Medicare and Medicaid Services (CMS) to be low priority.
- All initial certification surveys will be Medicaid-only.
 - *For Medicaid certification, contact LaNae Workman at (785) 291-3806 or by email at lanae.workman@ks.gov*

Newly Constructed Facilities:

A licensure survey must be completed and a license issued prior to completing a certification survey for Medicaid. Following licensure, at least one resident must be admitted prior to the initial Medicaid certification survey. Upon admittance of the first resident, the administrator is to notify the respective Regional Manager or this Commission to schedule the initial Medicaid certification survey.

Existing Facilities:

A determination will be made if a full survey is necessary, but if a facility has recently been surveyed a full survey may not be required.

To become certified as Medicare provider, facilities must be surveyed. Surveyors will inspect the facility, interview the administrator and staff members, review documents and undertake other procedures necessary to evaluate the extent to which a facility meets the requirements the administrator will be informed and given an opportunity to correct them. Following the survey, the Commission will recommend to CMS whether the facility should participate.

Facilities denied approval to participate in the Medicare program will be sent notification indicating the reasons for the denial plus information regarding their right to appeal.

As part of the application process, applicants for Medicare certification are required to complete application form CMS-855A "Medicare General Enrollment". The Medicare Administrative Contractor (MAC) has 60 days for review to either approve or deny the application. The MAC may return the application for additional information which would then restart the 60 day clock. Please note that a facility cannot be certified or scheduled for a survey, if one is necessary, before the CMS-855A application has been approved by the contactor.
