**March 2020**

**All data from the National PACE Association**

**Support. Innovate. Lead.**
States pay PACE programs 13% LESS than the cost of other Medicare services.

"Reduced Hospital Admissions: A 24 percent lower hospitalization rate than dually-eligible beneficiaries who receive Medicare fee-for-service benefits."iii

"Lower Rehospitalizations: 16 percent lower than the national rehospitalization rate of 22.9 percent for dually-eligible beneficiaries age 65 and over."iii

"Reduced ER Visits: Less than one emergency room visit per member per year."v

"Fewer Nursing Home Admissions: Despite being at nursing home level of care, PACE participants have a low risk of being admitted to a nursing home."v

PACE Provides a High Quality of Life

"There is high caregiver satisfaction. More than 96 percent of family members are satisfied with the support they receive through PACE, and 97.5 percent of family caregivers would recommend PACE to someone in a similar situation. While nearly half of family members reported a high caregiver burden at the time their loved one enrolled in PACE, more than 58 percent experienced less burden after enrollment."ix

"PACE enrollees are less likely to suffer depression. A study showed that 27 percent of new PACE enrollees scored as depressed on an assessment administered before enrollment. Nine months later, 80 percent of those individuals no longer scored as depressed.x"

"Participants rated their satisfaction with PACE as 4.1 out of 5.xi"
