This January 2, 2015 Flash Communication contains the following AuthentiCare® Kansas information:

- Upcoming changes to Worker Entity Screen

**Upcoming changes to Worker Entity Screen:**
In AuthentiCare, providers enter identifying information for each worker on the Worker Entity screen. When a provider saves that information, AuthentiCare assigns a 5-digit randomly-selected Worker ID number, unique to that provider agency, which allows the worker the ability to utilize the IVR or mobile application to create claims.

New fields will be added to the Worker Entity page beginning Monday, **January 5, 2015**, for provider entry of additional current worker information and for future workers’ information. Beginning that date, providers are to complete the following fields for current workers, and for new workers ongoing, in order to prepare for the date those fields are required.

The Work Visa # field has been added to the list of new fields effective **January 5, 2015**.

- If a worker does not have a Social Security Number, enter all nines (9s) in the Social Security number field, and then enter the Work Visa number in the field provided for that.
- If there are all nines (9s) in the Social Security number field, we will expect a worker’s Work Visa number entered in the Work Visa number field.

These required fields must be completed for new workers beginning **January 5, 2015**. If the required fields are not completed, new workers will not be able to log in to the IVR or mobile application. These required fields must be completed for current workers by **April 1, 2015**, or current workers will not be able to log in to the IVR or mobile application.
