- 1) Complete the forms accurately and legibly. Any report that is incomplete, illegible, or has its formulas altered will be returned to the provider. This may postpone the Rate Effective Date and result in additional penalties for late filings, as per K.A.R. 129-10-17.
- 2) All amounts must be rounded to the nearest dollar and sum to the total.
 - 3) Do not add lines to the forms. Use "OTHER" lines for resident-related expenses not designated on the Expense Statement, Schedule A. Attach a breakdown or list of items included on "other" lines if necessary.
 - 4) Do not cross out or re-title lines on the forms. Do not include more than one amount per line. If more than one amount or journal entry is combined, submit an attachment with explanation. The attachment should be sorted by cost report line number and should include subtotals.
- 5) Enter the ten (10) digit KDADS provider number and the fourteen (14) digit KMAP provider number on the "cover page entry" worksheet. Do not use any of the other identification numbers assigned to your facility.
- 6) Use the accrual method of accounting in reporting financial data. Revenues are reported in the period when earned, and not when received, and expenses are reported when incurred, not when paid.
- 7) Estimates of revenues and expenses are not acceptable.
- 8) All cost reports, historical or projected, must be for a period of 12 consecutive months except as provided in KAR 129-10-17 (e) (1). Providers who filed a projected cost report must file a historical report for the projection period and a historical report for the first calendar year following the end of the projection period.
 - 9) All calendar year cost reports shall be received by the agency no later than the close of business on the last working day of February. All other historical cost reports covering a projection status period shall be received by the agency no later than the close of business on the last working day of the second month after the reporting period ends. The provider may request a one-month extension of the due date by submitting the request in writing to the address in the submittal instructions within the time period allowed for filing the original cost report. The extension will be granted if the agency determines that the provider has shown good cause. **Note:** If a cost report is received after the due date without an approved time extension, the provider is subject to the penalties outlined in K.A.R. 129-10-17.
- 10) Each NF/NFMH must maintain adequate accounting and/or statistical records. Inadequate record keeping is cause for suspension of payments, per K.A.R. 129-10-15b. If non-NF/NFMH program expenses have been commingled with the NF or NFMH, see the instructions for provider adjustments on Schedule A, Expense Schedule.
- 11) Reimbursement rates (per diem) for NF: The per diem rate of reimbursement for those facilities participating in the Kansas Medical Assistance program is based on the reported costs and resident days as adjusted by a desk review of the cost report and payment limitations. Each cost report is also subject to a field audit to arrive at a final settlement for the period upon which the per diem rate was based.
- 12) **Kansas Administrative Regulations (KARs):** Copies of the regulations governing NF/NFMH Medicaid/KanCare reimbursement are available on the [Kansas Secretary of State - KAR \(ks.gov\)](http://ks.gov) website. NOTE: Since the Regulations may be changed, the preparer of the cost report should carefully review the most recent version prior to completing the form MS-2004 for submission.

- 13) **NURSING FACILITIES ATTACHED TO HOSPITALS:** A nursing facility that is attached or associated with a hospital and shares expenditures shall submit the cost report (MS- 2004), census sheets (AU-3902), and the following Medicare schedules:
- W/S A
 - A-6
 - A-8
 - B Part I
 - B-1
- a) Also include the working trial balance that includes both the hospital and the long-term unit.
- b) **Step-down process:** A "step-down process" will be run using the statistical information from W/S B-1 and the net expenses for cost allocation from Column 0 on W/S B Part 1. This will provide the indirect long-term care unit costs.
- i) Based on the long-term care cost to net expense ratio, each department cost will be allocated to the appropriate line of the cost report. The total cost reported on the cost report should equal the long-term care total, Column 25, on W/S B Part 1.
 - ii) While costs for the long-term care unit are calculated using this step-down process, not all of these calculated costs may be considered allowable costs for the cost report (MS-2004). Any cost that would not be otherwise considered allowable for a long-term care unit, such as identifiable clinic costs, assisted living expenses, non- allowable legal expenses, or costs related to collection of bad debts, would not be an allowable cost.
 - iii) Once calculated, these costs should be listed on lines 501-514 as Non- Reimbursable & Non-Resident Related Items.

Line 21 Check if the cost data is for the calendar year report period and does not include any portion of a projection period.

Line 22 Applies to projected cost reports for new providers and newly constructed facilities.

Line 23 Applies to providers filing their first historical cost report for a non-calendar year.

Lines 26-32: Check only one box. Check the type of business organization which most accurately describes your provider status or explain on line 33, Other. Limited Liability Companies should check the box that matches their declaration for tax purposes.

Then calculate and record the number of bed days at that bed count (multiply the bed count by the number of calendar days this count is maintained, see example below). If a change in the number of beds has occurred during the reporting period, show the increase or decrease, the date of the change, the new bed count, and the bed days at that count.

Example of Bed Days Calculation:

Assume a home of 20 beds was increased on July 1 to 25 beds, the number of bed days for the period would be determined as follows:

January 1 to June 30 - 181 days x 20 beds =	3,620 bed days
July 1 to December 31- 184 days x 25 beds =	<u>4,600</u> bed days
	8,220 bed days for period

Line 45: Record the bed count as of the ending date of the cost report period.

The resident day total should include reserve days. If both the admission and discharge occur on the same day, it shall count as a resident day. If the provider does not make refunds on behalf of a resident for unused days in the case of death or discharge, and if the bed is available and actually used by another resident, these unused days shall not be counted as a resident day. Any bed days paid for the resident before an admission date shall not be counted as a resident day. The total resident day count for the cost report period shall be accurate. An estimate of the days of care provided shall not be acceptable. The total resident days must agree with the 12 month "Resident Total" column as submitted on Form AU-3902 (Monthly Census Summary).

Day care and day treatment shall be counted as one resident day for 18 hours of service. The recipients of day care/treatment shall be listed on the monthly census summary of the Form (AU-3903) with the number of hours reflected on the appropriate day column.

Occupancy Percentage: Agency staff will determine this percentage.

Line 48a: Total Kansas Medical Assistance Days - Enter the total number of **Kansas Medical Assistance** days reported on the "NF & MH Total" column of Form AU-3902. Partial, as well as full paid days must be included (please refer to KAR 30-10-28). SCHEDULE K – STAFFING VACANCY REPORT

Schedule K – Staffing Vacancy Report, has been added as a separate worksheet to the Kansas Medicaid Nursing Facility Cost Report as of the 2018 cost report year. Completion of Schedule K will remain voluntary until further notice. The data on Schedule K will not be used in the calculation of rates and will not impact your Medicaid reimbursement. However, the data will provide valuable insight into Kansas nursing facility staffing issues; specifically, there is no current mechanism to gauge vacancy rates in nursing homes in Kansas. This information will be important for monitoring the strength of the current long-term care workforce. Likewise, this information can also be used in conjunction with turnover rates to help identify how many individuals need to be in training to fill the need for long-term care jobs. Furthermore, post-secondary educators and institutions can use these statistics when setting recruitment targets for programs intended to prepare long-term care workers. Please follow the instructions below for completing Schedule K.

Column 2 - Enter the maximum number of staff positions for each classification. This number should represent the maximum capacity of each Salary Classification, and may be greater than the number of employees entered on Schedule J.

Column 3 - Enter the average number of vacant positions during the cost report period for each salary classification. This can be estimated by dividing the number of days a position is vacant by the 365. If multiple positions were vacant, first add the days of vacancy together for each position before dividing the total by 365.

Example: Your facility has 5 total Dietary positions, and 2 of those positions were vacant during the year; one of those positions was vacant for 12 months, while the other position was vacant only for 3 months (May 1 – July 31). To determine the average number of vacant positions, you will divide the number of days vacant by 365 (or 366 on a Leap Year.) While the first position was vacant for all 365 days, the second position was vacant for the months of May (31 days), June (30 days) and July (31 days) – totaling 92 days. Take 365 plus 92 and divide the result by 365, which equals 1.252; enter the calculated result in Column 3.

$$365 + 92 = 457 / 365 = 1.252$$

Vacancy Rate: The data reported on Schedule K will automatically generate a vacancy rate, which calculates the average percentage of staffing positions that are not filled. This statistic is calculated by dividing the average number of vacancies by the average number of total positions. This provides valuable information regarding staffing and can be used to monitor staffing trends and labor market conditions.
