General Summary of Site Information

Sunflower Diversified Cherry Village Apt #37 is a single residence apartment that is adjacent to a skilled nursing facility. This setting is in an apartment building and does not look like a facility amongst other apartment buildings and is located by residential homes, apartments, and a skilled nursing facility. Each person served has their own private apartment that has a bedroom, bathroom, kitchen and living room that provides privacy for the person served. Sunflower Diversified has their own transportation system and all person served that reside at this setting can utilize and staff are trained to assist with arranging transportation on an individual basis, as needed, or requested. Person served can decide with family or friends to get a ride or use the public transportation system as well. All person served are free to come and go as they please and this makes it very easy to access the greater community resources and activities. Interviews verified that person served fully participate in choosing their daily activities in the greater community and work at attaining any goals they may have. It was made very apparent through interview and observation that person served knows how and who to ask when they express a desire to do an activity of their choosing. It was also observed that person served has a very good personal relationship with their staff and are very open when speaking to them and that helps facilitate their autonomy and choice. Throughout the entire assessment it was very easy to see that the person served was comfortable speaking openly and not being coerced in any way. There were interviews conducted for this setting and it consisted of one person served, the Executive Director and one staff member to determine their level of understanding of HCBS and the Final Settings Rule requirements/characteristics. The interviews were done by using a laptop and Microsoft Teams. Throughout the interview process it was made apparent these characteristics are taught to those who live and work there, written in policy and procedure and maintained through quality assurance processes. The interactions throughout the interviews and in general between staff and person served were very genuine and interpersonal. It was observed during the interviews that all staff are respectful to the person who live at this setting. It was made very apparent that the staff and person served interact regularly and do not hesitate to speak to all the necessary parties about things they would like to do/and or change about their current circumstances. Though this setting is on the grounds of/or adjacent to a Skilled Nursing Facility it is independent of any institution and provides Home and Community Based Services through education to all staff and person served as well as implementation of policy and procedure. The person served that lives in this setting is given the same rights and choices as their neighbors and community members and are not isolated from the broader community.

State Requirements for Providers:

Providers are required to comply with Kansas' home and community-based waiver regulations and provider mandates within the regulations, as well as other policies and procedures regularly updated to ensure compliance with home and community-based requirements. Kansas will require providers, based on pending revisions to existing regulations to follow this language. The term "Home and Community-Based Settings" as used in these regulations shall mean a set of qualities, as described in 42 C.F.R. § 441.301 (c) (4), that describe how settings deliver services to ensure the utmost integration into the community. The setting must allow residents full access to the greater community, including the opportunity to seek employment, engage in community life, control personal resources to the same degree of access as individuals not receiving home and community-based services. All HCBS participants will have a person-centered service plan based on the individual's preferences and choice, including a residential setting that is available in a non-disability setting. Settings must ensure an individual's right of privacy, dignity and respect, as well as optimizing, but not regimenting, individual initiative or autonomy in daily living activities, the physical environment and with whom the residents interact with.

If the facility is provider-owned or controlled then, in addition to providing the settings characteristics described above, the facility must provide residents a physical space that can be owned, leased or rented and must provide eviction protections under Kansas Landlord-Tenant law at a minimum. If the Kansas Tenant law does not apply, a written agreement (negotiated service agreement) that contains protections for evictions is required.

Settings must provide residents privacy in sleeping units, including units with entrance doors lockable by residents and with only appropriate staff having keys to their doors. Residents have the freedom to decorate their room as they please and have the freedom to control their schedules and access to food. Residents have the freedom to have visitors at any time and any restrictions must be documented in an approved person-centered plan.

Pre-Assessment Preparation Process with Provider

General heightened scrutiny guidance sessions are available to stakeholders, in addition to specific trainings for settings identified as having the presumptive characteristics of an institution and/or potential isolation to prepare organizations for the assessment. A member of the HCBS Compliance Team contacts the organization's identified persons to schedule an assessment. Depending on the assigned level of heightened scrutiny, a virtual walk-through and interview of management staff might be required. During the site visit outreach, the HCBS Compliance Team Member discusses what level of technology is needed to have the most effective outcome of the time. If a virtual visit is the chosen option, a member of the HCBS Compliance Team will need a walk-through by use of a camera, an internet connection, a way to transfer files, and a method for agency staff and the persons served/guardians to communicate with the Heightened Scrutiny Team Member during interviews via video, telephone, etc.

Interview Standards for Provider and Interviewees

Interview standards are set prior to the assessment and discussed with Providers. A statement is read to the interviewees before each survey to guard against staff influence. HCBS Team Members further advise that no one will be forced to participate in interviews and that they are completed in an hour or less. The following is a list of additional steps taken by the state to mitigate the influence of persons served responses during the heightened scrutiny assessment.

1. The use of a camera is required during the assessment for observations of the surrounding environment and to validate compliance of assessment questions where needed.
2. Requests are made for private interviews with persons served. Exceptions will be given in situations when individuals are extremely nervous or non-verbal. In such cases, additional supports can be provided in the interview room. However, responses from the individual must be taken without interference from the support person. For non-verbal individuals, the interviewer observes non-verbal cues during the meeting to assure the absence of influence.
3. The state uses a two-way communication method via the HCBS Compliance Portal/emails to educate provider staff about the interview and assessment standards. This line of communication allows Providers to raise questions prior to the site visit and to provide any additional evidence documents.
4. State staff do not provide interview questions prior to the site visit. Interviewees are not able to know what will be asked during the assessment to guard against providers and/or supports having the opportunity to prepare an interviewee before the assessment.

Additional Heightened Scrutiny Assessment Standards

In addition to the heightened scrutiny process, providers are required to submit policies and procedures for evaluation by the state through validation and desk reviews outside the heightened scrutiny process. Through the remediation process, the state will review a Provider's current training, policies, manuals, and procedures for HCBS characteristics and requirements. When these requirements are not present or insufficient at the Provider level, they are required to submit a remediation plan with a projected completion date. Providers who go through the heightened scrutiny process are required to comply with all aspects of the settings final rule and prove capability of overcoming the presumptions of institutionalization. Additional documentation reviewed for compliance include a participant's lease/residency agreement or service agreement, provider manuals, policies, handbooks and training processes and documentation.
