

Adult Care Home Involuntary Discharge Survey

User Guide for KDADS

Purpose

The Adult Care Home (ACH) Involuntary Discharge Survey (IDS) application provides assisted living facilities, residential healthcare facilities, home plus facilities, and boarding care homes a method to report details upon the completion of every <u>involuntary</u> transfer or discharge of a resident pursuant to K.A.R. 26-39-102(d) and (f) or to report no monthly discharges for a specific month to the Kansas Department for Aging and Disability Services (KDADS). The ACH IDS application also provides a dashboard and reports for the ACH facilities and KDADS to track previously submitted surveys to KDADS.

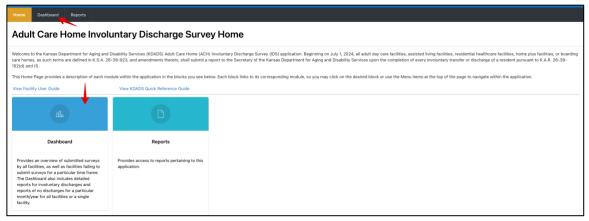

Accessing the ACH IDS Application

- 1. Open the Kansas Department for Aging and Disability Services website at www.kdads.ks.gov.
- 2. Click on the Web Applications link, located under the QUICK LINKS section on the right side of the home page.
- 3. Click on the *Oracle Web Apps* icon under the *Oracle Web Applications* section.
- 4. Log into the *KDADS Oracle Web Applications* site using your username and password provided by the KDADS Applications Help Desk.
- 5. Once you are logged in, click the *Adult Care Home IDS* icon, shown below, on the main *KDADS Oracle Web Applications* page. If you do not see the icon, you most likely are not configured with the required security role. Contact the KDADS Applications Help Desk for assistance.

Reviewing Survey Submissions

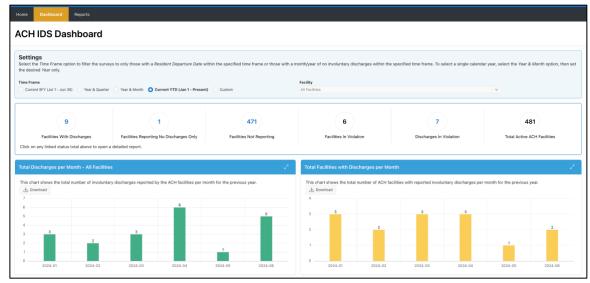

1. Once you have opened the ACH IDS application, click on the Dashboard menu item at the top of the page or click on the Dashboard block on the ACH IDS Home page, as shown below.

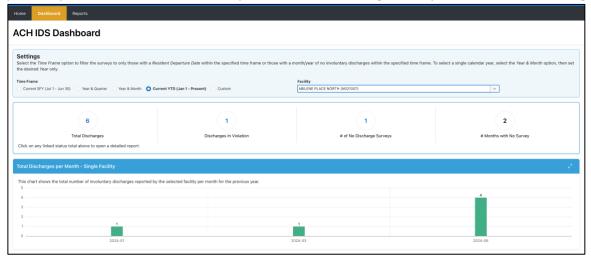

- 2. When the *Dashboard* page opens, you will notice that the *Time Frame* setting defaults to the *Current YTD* option. To change the *Time Frame* option, click one of the other available options and set any other sub-options that may appear depending on the *Time Frame* option you select.
- 3. If you set the *Facility* filter option to *All Facilities*, which is the default setting, the *Dashboard* will show a count of the following items:
 - the total number of facilities that reported involuntary discharges during the selected time frame
 - the total number of facilities which submitted at least one survey reporting no discharges for a single month during the selected time frame
 - the total number of facilities which did not submit any survey during the selected time frame
 - the total number of facilities in violation of the 60-day reporting requirement during the selected time frame
 - the total number of discharges in violation of the 60-day reporting requirement during the selected time frame
 - the total number of active ACH facilities in KOTA

Note: A facility will only be included in one of the first three counts mentioned above. For example, if your time frame is set for January through March of a given year, a facility that submitted a survey reporting an actual involuntary discharge in January and surveys reporting no discharges for February and March, would only be included in the *Facilities with Discharges* count.

Additionally, the *Dashboard* includes a bar chart showing the total number of involuntary discharges reported by all ACH facilities per month for the previous year and a bar chart showing the total number facilities which reported involuntary discharges per month for the previous year. An example *Dashboard* page is shown in the figure below.

- 4. To open a detailed report for any of the linked counts shown on the dashboard, click on the linked total. To download the report or print the report as a PDF, use the *Download* option on the *Actions* dropdown menu after opening the desired report.
- 5. If you set the *Facility* filter option to a specific facility, the dashboard will show a count of the following items:
 - the total number of involuntary discharges submitted by the selected facility during the selected time frame
 - the total number of involuntary discharges submitted by the selected facility during the selected time frame which were in violation of the 60-day reporting requirement
 - the total number of surveys reporting no discharges for a single month during the selected time frame submitted by the selected facility
 - the total number of months that the facility did not submit any survey during the selected time frame.
- To open a detailed report for any of the linked counts shown on the dashboard, click on the linked total. To download the report or print the report as a PDF, use the *Download* option on the *Actions* dropdown menu after opening the desired report.
- 7. When you set the *Facility* filter option to a specific facility, the dashboard will also include the *Total Discharges* per Month Single Facility bar chart, which shows the total number of involuntary discharges reported by the facility for the previous 12 months. An example Dashboard for a single facility is shown in the following figure.

Reports

The ACH IDS application contains two standard reports which can be accessed from either the *Reports* menu item at the top of the page or by clicking on the *Reports* block on the *ACH IDS Home* page.

The two reports are the *Discharge Reporting Violations* report and the *All Discharge Surveys* report.

To open either report, click on their respective block on the *Reports* page.
