UNIFORM APPLICATION

FY 2022 Substance Abuse Block Grant Report

SUBSTANCE ABUSE PREVENTION AND TREATMENT BLOCK GRANT

OMB - Approved 04/19/2019 - Expires 04/30/2022
(generated on 08/24/2022 11.23.58 AM)

Center for Substance Abuse Prevention
Division of State Programs

Center for Substance Abuse Treatment
Division of State and Community Assistance

I: State Information

State Information

I. State Agency for the Block Grant

Agency Name Kansas Department for Aging and Disability Services (KDADS)

Organizational Unit Behavioral Health Services

Mailing Address 503 S. Kansas Ave.

City Topeka

Zip Code 66603

II. Contact Person for the Block Grant

First Name Andrew

Last Name Brown

Agency Name Kansas Department for Aging and Disability Services

Mailing Address 503 S. Kansas Ave.

City Topeka

Zip Code 66603

Telephone 785-291-3359

Fax 785-296-0256

Email Address Andrew.Brown@ks.gov

III. Expenditure Period

State Expenditure Period

From 7/1/2020

To 6/30/2021

Block Grant Expenditure Period

From 10/1/2018

To 9/30/2020

IV. Date Submitted

Submission Date 11/19/2021 4:52:41 PM

Revision Date 4/6/2022 4:34:45 PM

V. Contact Person Responsible for Report Submission

First Name Cissy

Last Name McKinzie

Telephone (785) 296-4079

Fax (785) 296-0256

Email Address Tamberly.McKinzie@ks.gov

VI. Contact Person Responsible for Substance Abuse Data

First Name Rahasya

Last Name Bharaniah

Telephone (785) 296-0130

Email Address Rahasya.Bharaniah@ks.gov

Footnotes:

The FY2022 Substance Abuse Block Grant Annual Report was posted for public comment on the KDADS website on November 14, 2021 through 3 p.m. on 11/18/21. No public comment was received.

II: Annual Update

Table 1 Priority Area and Annual Performance Indicators - Progress Report

Priority #: 1
Priority Area: Reduce underage drinking in Kansas
Priority Type: SAP
Population(s): PP

Goal of the priority area:

Reduce the percentage of students in grades 6, 8, 10, and 12 that report drinking alcohol in the past 30-days.

Objective:

Completion of community-level comprehensive strategic planning and provision of supports for community initiatives utilizing all steps of the Strategic Prevention Framework to address underage alcohol use through the implementation of evidence-based prevention programs, practices, and policies.

Strategies to attain the goal:

Kansas does not implement any one strategy statewide, aside from our "It Matters" media campaign, rather communities complete the planning phase of the SPF and utilize their needs assessment to create a logic model and identify strategies that identify with their particular community needs and capacity. All strategies must be evidence based and Kansas utilizes SAMHSA's definition when reviewing individual strategic plans.

Edit Strategies to attain the objective here:

(if needed)

Annual Performance Indicators to measure goal success

Indicator #: 1
Indicator: On how many occasions, if any, have you had beer, wine, or hard liquor in the past 30 days? (at least once)
Baseline Measurement: State = 16.36%; KPCCI Communities 14.20%
First-year target/outcome measurement: State = 16.12%; KPCCI Communities = 13.45%
Second-year target/outcome measurement: State = 15.91%; KPCCI Communities = 12.8%
New Second-year target/outcome measurement(if needed):

Data Source:

Kansas Communities That Care (KCTC) Student Survey

New Data Source(if needed):

Description of Data:

The Kansas Communities That Care (KCTC) youth survey has been administered annually free of charge throughout the state since 1994. The survey tracks teen use of harmful substances such as alcohol, tobacco and other drugs. In addition, the survey provides a baseline for teen participation in, perception of, and attitudes toward both prosocial and antisocial behavior at the peer, school, family and community levels. It provides a measurable level of risk and protective factors that influence behavior, attitudes, and opinions of Kansas teens.

New Description of Data:(if needed)

Data issues/caveats that affect outcome measures:

In 2015 active consent legislation was passed, initially creating challenges for local school districts to obtain the required parental consent and significantly impacting statewide participation rates as well as many local participation rates. Since then, the prevention

system has worked with both school districts across the state to implement strategies to streamline the consent process and increase participation; this focused effort has led to increased participation statewide and among many school districts. There are however a few districts that are outliers and the state is working continuously to engage them and significant progress has been made within the last year. Funded communities are required to achieve a 60 percent participation rate; if at time they are not at 60 percent they must create specific action plans demonstrating that they will implement strategies to increase participation.

New Data issues/caveats that affect outcome measures:

Some strategies were disrupted due to the COVID-19 pandemic and early school closures.

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved *(if not achieved, explain why)*

Reason why target was not achieved, and changes proposed to meet target:

How first year target was achieved (optional):

Second Year Target: Achieved Not Achieved *(if not achieved, explain why)*

Reason why target was not achieved, and changes proposed to meet target:

How second year target was achieved (optional):

Community collations implemented evidence-based strategies designed to reduce youth marijuana use and prevention the onset of use. Strategic plans included a combination of environmental, media, and prevention education strategies. Some strategies were disrupted due to the COVID-19 pandemic and early school closures. Similar to what was seen across the nation, youth reported substance showed a reduction in Kansas. In addition to the implementation of prevention strategies, this reduction may, in part be impacted by changing COVID environments related to less peer interaction and potential reduced access to substances, etc.

Priority #: 2

Priority Area: Reduce adolescent marijuana use in Kansas

Priority Type: SAP

Population(s): PP

Goal of the priority area:

Reduce the percentage of students in grades 6, 8, 10, and 12 that report using marijuana in the past 30-days.

Objective:

Completion of community-level comprehensive strategic planning and provision of supports for community initiatives utilizing all steps of the Strategic Prevention Framework to address adolescent marijuana use through the implementation of evidence-based prevention programs, practices, and policies.

Strategies to attain the goal:

Kansas does not implement any one strategy statewide, aside from our "It Matters" media campaign. Communities complete the planning phase of the SPF and utilize their needs assessment to create a logic model and identify strategies that identify with their particular community needs and capacity. All strategies must be evidence-based and Kansas utilizes SAMHSA's definition when reviewing individual strategic plans.

Edit Strategies to attain the objective here:

(if needed)

Annual Performance Indicators to measure goal success

Indicator #:	1
Indicator:	On how many occasions, if any, have you used marijuana in the past 30 days? (at least once)
Baseline Measurement:	State = 7.24%; KPC Communities = 8.70%
First-year target/outcome measurement:	State = 7.00; KPC Communities = 8.20%
Second-year target/outcome measurement:	State = 6.50%; KPC Communities = 7.45%

New Second-year target/outcome measurement(if needed):

Data Source:

Kansas Communities That Care (KCTC) Student Survey

New Data Source(if needed):

New Data issues/caveats that affect outcome measures:

Some strategies were disrupted due to the COVID-19 pandemic and early school closures.

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved (if not achieved,explain why)

Reason why target was not achieved, and changes proposed to meet target:

How first year target was achieved (optional):

Second Year Target: Achieved Not Achieved (if not achieved,explain why)

Reason why target was not achieved, and changes proposed to meet target:

How second year target was achieved (optional):

Community collations implemented evidence-based strategies designed to reduce youth marijuana use and prevention the onset of use. Strategic plans included a combination of environmental, media, and prevention education strategies. Some strategies were disrupted due to the COVID-19 pandemic and early school closures. Similar to what was seen across the nation, youth reported substance showed a reduction in Kansas. In addition to the implementation of prevention strategies, this reduction may, in part be impacted by changing COVID environments related to less peer interaction and potential reduced access to substances, etc.

Priority #: 3

Priority Area: Reduce low perception of harm from alcohol and marijuana use among Kansas youth

Priority Type: SAP

Population(s): PP

Goal of the priority area:

Reduce percentage of students in ages 6, 8, 10, and 12 that report there is "no risk" of harm from taking one or two drinks of an alcoholic beverage nearly every day.

Objective:

Completion of community-level comprehensive strategic planning and provision of supports for community initiatives utilizing all steps of the Strategic Prevention Framework to address low perceived risk of harm from regular alcohol use through the implementation of evidence-based prevention

programs, practices, and policies.

Strategies to attain the goal:

Kansas does not implement any one strategy statewide, aside from our "It Matters" media campaign. Communities complete the planning phase of the SPF and utilize their needs assessment to create a logic model and identify strategies that identify with their particular community needs and capacity. All strategies must be evidence-based and Kansas utilizes SAMHSA's definition when reviewing individual strategic plans.

**Edit Strategies to attain the objective here:
(if needed)**

Annual Performance Indicators to measure goal success

Indicator #: 1

Indicator: How much do you think people risk harming themselves, physically or in other ways, if they take one or two drinks of an alcoholic beverage nearly every day? (no risk)

Baseline Measurement: State = 14.41%; KPC Communities = 16.92%

First-year target/outcome measurement: State = 13.91%; KPC Communities = 16.42%

Second-year target/outcome measurement: State = 13.41%; KPC Communities = 15.92%

New Second-year target/outcome measurement(if needed):

Data Source:

Kansas Communities That Care (KCTC) Student Survey

New Data Source(if needed):

New Data issues/caveats that affect outcome measures:

Some strategies were disrupted due to the COVID-19 pandemic and early school closures.

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved (if not achieved, explain why)

Reason why target was not achieved, and changes proposed to meet target:

How first year target was achieved (optional):

Second Year Target: Achieved Not Achieved (if not achieved, explain why)

Reason why target was not achieved, and changes proposed to meet target:

How second year target was achieved (optional):

Community coalitions implemented evidence-based strategies designed to reduce youth alcohol use, reduce the risk factors for use, and prevent the onset of use. Data indicated that youth had low perceived risk of harm from regular alcohol use, which is why this priority was chosen. However in year one, not all grantees were implementing strategies related to risk. As such, if in year two grantees were not already implementing strategies to address low perceived risk of harm, they were requested to do so. The percentage of youth reporting there was no risk of harm from regular alcohol use decreased and met the targeted projected in both year one and year two.

Indicator #: 2

Indicator: Reduce percentage of students in ages 6, 8, 10, and 12 that report there is "no risk" of harm from regular marijuana use.

Baseline Measurement: State = 16.66%; KPC Communities = 22.32%

First-year target/outcome measurement: State = 16.16%; KPC Communities = 21.82%

Second-year target/outcome measurement: State = 15.66%; KPC Communities = 21.32%

New Second-year target/outcome measurement(if needed):

Data Source:

Kansas Communities That Care (KCTC) Student Survey

New Data Source(if needed):

Description of Data:

The Kansas Communities That Care (KCTC) youth survey has been administered annually free of charge throughout the state since 1994. The survey tracks teen use of harmful substances such as alcohol, tobacco and other drugs. In addition, the survey provides a baseline for teen participation in, perception of, and attitudes toward both prosocial and antisocial behavior at the peer, school, family and community levels. It provides a measurable level of risk and protective factors that influence behavior, attitudes, and opinions of Kansas teens.

New Description of Data:(if needed)

Data issues/caveats that affect outcome measures:

In 2015 active consent legislation was passed, initially creating challenges for local school districts to obtain the required parental consent and significantly impacting statewide participation rates as well as many local participation rates. There are however a few districts that are outliers and the state is working continuously to engage them and significant progress has been made within the last year. Funded communities are required to achieve a 60 percent participation rate; if at time they are not at 60 percent they must create specific action plans demonstrating that they will implement strategies to increase participation.

New Data issues/caveats that affect outcome measures:

Some strategies were disrupted due to the COVID-19 pandemic and early school closures.

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved (if not achieved, explain why)

Reason why target was not achieved, and changes proposed to meet target:

Across the state, the percentage of students that reported 'no risk' of harm from regular marijuana use remained relatively unchanged, however KPCCI communities with direct funding to implement prevention strategies showed a reduction below 1st year target rate. In order to bring more emphasis on this priority, in addition to the risk factors they determined, new grantees must also include strategies to address low perceived risk of harm.

How first year target was achieved (optional):

Second Year Target: Achieved Not Achieved (if not achieved, explain why)

Reason why target was not achieved, and changes proposed to meet target:

How second year target was achieved (optional):

Community coalitions implemented evidence-based strategies designed to reduce youth marijuana use, reduce the risk factors for use, and prevent the onset of use. Data indicated that youth had low perceived risk of harm from regular marijuana use, which is why this

priority was chosen. Year one target was not achieved. As a result, if in year two grantees were not already implementing strategies to address low perceived risk of harm, they were requested to do so. The percentage of youth reporting there was no risk of harm from regular marijuana use decreased and met the targeted projection in year two.

Priority #: 4
Priority Area: KPCCI at-risk population identification and implementation of appropriate evidence-based strategies
Priority Type: SAP
Population(s): PP

Goal of the priority area:

Apply the data-driven Strategic Prevention Framework process to identify and address sub-populations with gaps in service or at high risk to improve behavioral health outcomes.

Objective:

Communities will use data to identify at least one at risk population (e.g. ethnicity, race, gender, age group, etc.) in their community and then implement programs, policies, or practices to reduce risk.

Strategies to attain the goal:

Communities will utilize their KCTC data to identify and target at risk populations and identify appropriate evidence based strategies. Each community's assessment will be unique to their individual needs and data outcomes. All strategies must be evidence-based as Kansas utilizes SAMHSA's definition when reviewing individual strategic plans.

**Edit Strategies to attain the objective here:
(if needed)**

Annual Performance Indicators to measure goal success

Indicator #: 1
Indicator: Number of KPCCI communities completing at risk population assessment
Baseline Measurement:
First-year target/outcome measurement: All (100%) funded KPCCI communities will complete assessment to identify one 'at risk' population within their community and plan for appropriate prevention strategies to reduce risk. Community-level data will be used to measure progress.
Second-year target/outcome measurement: All (100%) funded KPCCI communities will implement prevention strategies to reduce risk among identified at risk population. Community-level data will be used to measure risk reduction.

New Second-year target/outcome measurement(if needed):

Data Source:

Kansas Communities That Care (KCTC) Student Survey; Behavioral Health Report

New Data Source(if needed):

Description of Data:

The Kansas Communities That Care (KCTC) youth survey has been administered annually free of charge throughout the state since 1994. The survey tracks teen use of harmful substances such as alcohol, tobacco and other drugs. In addition, the survey provides a baseline for teen participation in, perception of, and attitudes toward both prosocial and antisocial behavior at the peer, school, family and community levels. It provides a measurable level of risk and protective factors that influence behavior, attitudes, and opinions of Kansas teens.

New Description of Data:(if needed)

Data issues/caveats that affect outcome measures:

In 2015 active consent legislation was passed, initially creating challenges for local school districts to obtain the required parental

consent and significantly impacting statewide participation rates as well as many local participation rates. Since then, the prevention system has worked with both school districts across the state to implement strategies to streamline the consent process and increase participation; this focused effort has led to increased participation statewide and among many school districts. There are however a few districts that are outliers and the state is working continuously to engage them and significant progress has been made within the last year. New Data issues/caveats that affect outcome measures:

Some strategies were disrupted due to the COVID-19 pandemic and early school closures.

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved *(if not achieved, explain why)*

Reason why target was not achieved, and changes proposed to meet target:

How first year target was achieved (optional):

Second Year Target: Achieved Not Achieved *(if not achieved, explain why)*

Reason why target was not achieved, and changes proposed to meet target:

How second year target was achieved (optional):

Following SAMHSA's lead, Kansas wanted to ensure communities were focusing on health disparities and high risk subpopulations. This became a block grant priority. To achieve this goal, the Kansas Prevention Collaborative provided coalitions with additional training on health disparities and data reports and sources to help identify their areas of need. KPC Community Support Specialists and Evaluators assisted coalitions in developing a tailored Health Disparities Impact Statement which was a grant deliverable in Year one. Strategy action plans included steps to address the identified at risk population for implementation in year two.

Priority #: 5

Priority Area: Provide access to community-based services for children/youth with SED allowing them to remain in their homes and communities with services and supports

Priority Type: MHS

Population(s): SED

Goal of the priority area:

Children with SED are able to remain in home by building a community-based system of care to meet their needs.

Objective:

Increase the utilization of community-based services in order to reduce the utilization of inpatient services.

Strategies to attain the goal:

Kansas does not implement any one strategy statewide. Continue to identify culturally-competent, person-centered services to meet the child's/youth's needs.

**Edit Strategies to attain the objective here:
(if needed)**

Annual Performance Indicators to measure goal success

Indicator #:	1
Indicator:	Percentage of children/adolescents, age 17 or younger, that received crisis intervention services (30) calendar days prior to a screen resulting in inpatient psychiatric admission, excluding PRTF.
Baseline Measurement:	Establishing a baseline for FY2020
First-year target/outcome measurement:	Establishing a baseline for FY2020
Second-year target/outcome measurement:	Based upon the baseline, determine a realistic target/outcome measurement

New Second-year target/outcome measurement(if needed):

Data Source:

Contractor of the Crisis Triage & Screening (CTS) contract and AIMS (Automated Information Management System) AIMS is a centralized database managed by KDADS and entered into by CMHC staff. AIMS tracks a comprehensive data set including consumer demographic information and mental health services provided by the CMHCs to Kansans.

New Data Source(if needed):

Description of Data:

Numerator: Number of children/adolescents that received crisis services (30) calendar days prior to crisis screen resulting in admission within reporting period. The following codes will be utilized: H2011, H2011-HK and/or H2011-HO (code numbers are subject to change by CMS)

Denominator: Number children/adolescents with a screen resulting in admission to inpatient within reporting period

New Description of Data:(if needed)

Data issues/caveats that affect outcome measures:

This measurement relies upon contractor data, so ensuring the contractor's data is complete and accurate.

New Data issues/caveats that affect outcome measures:

As of November 2021, the process has been revised on calculating this performance indicator to utilize both social security numbers and Medicaid IDs for children/youth in order to match service records to screening data. Previously reported data may have been incomplete due to not all records being matched properly. In addition, previous reporting was unable to remove duplicates from the denominator to account for clients who had multiple screens resulting in admission during the reporting period. The updated data reflects the more complete matching process, along with unduplicated counts for both numerator and denominator.

SFY2019: 178/1224 = 14.54%

SFY2020: 99/845 = 11.72%

SFY2021: 69/596 = 11.58%

Data relies on the accuracy and completeness of records by the CTS contractor and CMHC data submissions to AIMS. Missing or incomplete data may impact data reported. The State will continue to work with the appropriate entities to increase the reliability of these data sources. Lack of historical data remains an issue when evaluating how COVID-19 may have played a role in the decreasing trend represented by current available data.

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved (if not achieved,explain why)

Reason why target was not achieved, and changes proposed to meet target:

How first year target was achieved (optional):

Baseline (FY2020): 46/600 = 7.67%

We now have data structured to allow a comparison between SFY2019 and SFY2020. In SFY2020, fewer children received crisis services 30 calendar days prior to crisis screen resulting in admission. Because we do not have historical data prior to SFY2019 structured in a way to allow us to make a comparison with SFY2019, we cannot compare with SFY2020 to make a clear determination that more children stayed in their home communities or if the COVID-19 Pandemic played a role in the decrease.

Second Year Target: Achieved Not Achieved (if not achieved,explain why)

Reason why target was not achieved, and changes proposed to meet target:

How second year target was achieved (optional):

The second year target/outcome outcome measurement has been achieved in that a realistic target/outcome measurement has been determined. However, the State continues to work with the appropriate entities to increase the reliability of these data sources that determine outcomes/trends. KDADS has begun internal reporting of data on this measure quarterly to contractors to improve the ability to analyze future trends and changes with this performance measure. Please also note that COVID-19 restrictions and impacts during this reporting period may have affected outcomes as represented in the decreasing trend reported in current available data.

Indicator: The percentage of children/adolescents that received therapeutic intervention services (includes more than initial assessment and diagnosis such as Peer Support, Psychosocial individual/group, Community Psychiatric Support and Treatment, Therapy and/or Intake) within thirty (30) calendar days prior to a screen resulting in an inpatient psychiatric admission, excluding PRTF.

Baseline Measurement: Establishing a baseline for FY2020.

First-year target/outcome measurement: Establishing a baseline for FY2020.

Second-year target/outcome measurement: Based upon the established baseline, determine a realistic target/outcome measure.

New Second-year target/outcome measurement(if needed):

Data Source:

Contractor of the Crisis Triage & Screening (CTS) contract and AIMS (Automated Information Management System) AIMS is a centralized database managed by KDADS and entered into by CMHC staff. AIMS tracks a comprehensive data set including consumer demographic information and mental health services provided by the CMHCs to Kansans.

New Data Source(if needed):

Description of Data:

Numerator: Number of children/adolescents receiving a therapeutic intervention within 30 calendar days prior to a screen resulting in admission within reporting period. Services codes are as follows: 90791, H0036-HA, H0036-HB, H0036-HH, H0036-HJ, H0036-HK, H2017, H2017-HQ, H2017-TJ, H0038, H0038-HG, 90832, 90834, 90837, 90839, 90840, 90847, 90847HK, 90853, 90832, 90834, 90837, 90839, and/or 90840. (code numbers are subject to change by CMS)

Denominator: Total number of children/adolescents with a screen resulting in an inpatient psychiatric admission, excluding PRTF, within reporting period

New Description of Data:(if needed)

Data issues/caveats that affect outcome measures:

This measurement relies upon contractor data, so ensuring the contractor's data is complete and accurate.

New Data issues/caveats that affect outcome measures:

As of November 2021, the process has been revised on calculating this performance indicator to utilize both social security numbers and Medicaid IDs for children/youth in order to match service records to screening data. Previously reported data may have been incomplete due to not all records being matched properly. In addition, previous reporting was unable to remove duplicates from the denominator to account for clients who had multiple screens resulting in admission during the reporting period. The updated data reflects the more complete matching process, along with unduplicated counts for both numerator and denominator.

SFY2019: 504/1224 = 41.18%

SFY2020: 279/845 = 33.02%

SFY2021: 149/596 = 25.00%

Data relies on the accuracy and completeness of records by the CTS contractor and CMHC data submissions to AIMS. Missing or incomplete data may impact data reported. The State will continue to work with the appropriate entities to increase the reliability of these data sources. Lack of historical data remains an issue when evaluating how COVID-19 may have played a role in the decreasing trend represented by current available data.

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved (if not achieved, explain why)

Reason why target was not achieved, and changes proposed to meet target:

How first year target was achieved (optional):

Baseline (FY2020): 98/600 = 16.33%

We now have data structured to allow a comparison between SFY2019 and SFY2020. The percentage of children/adolescents that received therapeutic intervention services (includes more than initial assessment and diagnosis such as Peer Support, Psychosocial individual/group, Community Psychiatric Support and Treatment, Therapy and/or Intake) within thirty (30) calendar days prior to a screen resulting in an inpatient psychiatric admission decreased. Because we do not have historical data prior to SFY2019 structured in a way to allow us to make a comparison with SFY2019, we cannot compare with SFY2020 to make a clear determination that more children stayed in their home communities or if the COVID-19 Pandemic played a role in the decrease.

The second year target/outcome measurement has been achieved in that a realistic target/outcome measurement has been determined. However, the State continues to work with the appropriate entities to increase the reliability of these data sources that determine outcomes/trends. KDADS has begun internal reporting of data on this measure quarterly to contractors to improve the ability to analyze future trends and changes with this performance measure. Please also note that COVID-19 restrictions and impacts during this reporting period may have affected outcomes as represented in the decreasing trend reported in current available data.

Priority #: 6

Priority Area: Provide access to community-based services for adults with SMI allowing them to remain in their homes and communities with services and supports

Priority Type: MHS

Population(s): SMI

Goal of the priority area:

Adults with SMI are able to maintain community living and build a support system of care to improve their quality of life.

Objective:

Increase the utilization of community-based services in order to reduce the utilization of inpatient services.

Strategies to attain the goal:

Kansas does not implement any one strategy statewide. Continue to identify culturally-competent, person-centered services to meet the person's needs.

**Edit Strategies to attain the objective here:
(if needed)**

Annual Performance Indicators to measure goal success

Indicator #: 1

Indicator: Percentage of adults, age 18 and older, that received crisis intervention services (30) calendar days prior to a screen resulting in admission to a State Mental Health Hospital (SMHH) or State Hospital Alternative (SHA) as utilized by the Osawatomie Temporary Census Diversion Funds (OTCDF).

Baseline Measurement: Establishing a baseline for FY2020.

First-year target/outcome measurement: Establishing a baseline for FY2020.

Second-year target/outcome measurement: Based upon the baseline, determine a realistic target/outcome measurement.

New Second-year target/outcome measurement(if needed):

Data Source:

Contractor of the Crisis Triage & Screening (CTS) contract and AIMS (Automated Information Management System) AIMS is a centralized database managed by KDADS and entered into by CMHC staff. AIMS tracks a comprehensive data set including consumer demographic information and mental health services provided by the CMHCs to Kansans.

Denominator: Screens resulting in admission to inpatient within reporting period

New Description of Data:(if needed)

Data issues/caveats that affect outcome measures:

This measurement relies upon contractor data, so ensuring the contractor's data is complete and accurate.

New Data issues/caveats that affect outcome measures:

We are developing our baseline and have found that the social security numbers of adults need to be included in our data and the data we receive from our vendor to verify that we are not duplicating counts. While we were able to verify many most of the adults for the baseline but will need to include the social security number for future outcome measures.

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved (if not achieved,explain why)

Reason why target was not achieved, and changes proposed to meet target:

How first year target was achieved (optional):

Baseline (FY2020): 40/1694 = 2.36%

We now have data structured to allow a comparison between SFY2019 and SFY2020. Percentage of adults, age 18 and older, that received crisis intervention services thirty (30) calendar days prior to a screen resulting in admission to a State Mental Health Hospital (SMHH) or State Hospital Alternative (SHA) as utilized by the Osawatomie Temporary Census Diversion Funds (OTCDF) decreased. Because we do not have historical data prior to SFY2019 structured in a way to allow us to make a comparison with SFY2019, we cannot compare with SFY2020 to make a clear determination that more adults stayed in their home communities or if the COVID-19 Pandemic played a role in the decrease.

Second Year Target: Achieved Not Achieved (if not achieved,explain why)

Reason why target was not achieved, and changes proposed to meet target:

How second year target was achieved (optional):

Second Year (FY2021): 167/1930 = 8.65%
The data from the state hospitals and diversion is more complete records for SFY21 which increased our ability to match records to encounters data and therefore our data is more accurate.

Indicator #:

2

Indicator:

The percentage of adults that received therapeutic intervention services (includes more than initial assessment and diagnosis such as Peer Support, Psychosocial individual/group, Community Psychiatric Support and Treatment, Therapy, and/or Intake) within seven calendar days of discharge from a State Mental Health Hospital (SMHH) or State Hospital Alternative (SHA) as utilized by the Osawatomie Temporary Census Diversion Funds (OTCDF).

Baseline Measurement:

Establish a baseline for FY2020.

First-year target/outcome measurement:

Establish a baseline for FY2020.

Second-year target/outcome measurement:

Based upon the baseline, determine a realistic target/outcome measurement.

New Second-year target/outcome measurement(if needed):

Data Source:

Contractor of the Crisis Triage & Screening (CTS) contract and AIMS (Automated Information Management System) AIMS is a centralized database managed by KDADS and entered into by CMHC staff. AIMS tracks a comprehensive data set including consumer demographic information and mental health services provided by the CMHCs to Kansans.

New Data Source(if needed):

Description of Data:

Numerator: Number of adults receiving CSS services who had a therapeutic intervention within seven business days of discharge from a SMHH within reporting period. Services codes are as follows: 90791, H0036-HA, H0036-HB, H0036-HH, H0036-HJ, H0036-HK, H2017, H2017-HQ, H2017-TJ, H0038, H0038-HG, 90832, 90834, 90837, 90839, 90840, 90847, 90847HK, 90853, 90832, 90834, 90837, 90839, and/or 90840. seven calendar from start the day after discharge however if a CMHC provides one of these services the same day as discharge then that will count toward the seven days. (code numbers are subject to changes by CMS)

Denominator: Total number of adult discharges from SMHH or SHA within the reporting period.

New Description of Data:(if needed)

Data issues/caveats that affect outcome measures:

Measurement relies upon contractor data, so ensuring the contractor's data is complete and accurate.

New Data issues/caveats that affect outcome measures:

We are developing our baseline and have found that the social security numbers of adults need to be included in our data and the data we receive from our vendor to verify that we are not duplicating counts. While we were able to verify many most of the adults for the baseline but will need to include the social security number for future outcome measures.

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved (if not achieved,explain why)

Reason why target was not achieved, and changes proposed to meet target:

How first year target was achieved (optional):

Baseline (FY2020): 147/2050 = 7.17%

We now have data structured to allow a comparison between SFY2019 and SFY2020. The percentage of adults that received therapeutic intervention services (includes more than initial assessment and diagnosis such as Peer Support, Psychosocial individual/group, Community Psychiatric Support and Treatment, Therapy, and/or Intake) within seven calendar days of discharge from a State Mental Health Hospital (SMHH) or State Hospital Alternative (SHA) as utilized by the Osawatomie Temporary Census Diversion Funds (OTCDF) decreased. Because we do not have historical data prior to SFY2019 structured in a way to allow us to make a comparison with SFY2019, we cannot compare with SFY2020 to make a clear determination that more adults stayed in their home communities or if the COVID-19 Pandemic played a role in the decrease.

Second Year Target: Achieved Not Achieved (if not achieved,explain why)

Reason why target was not achieved, and changes proposed to meet target:

How second year target was achieved (optional):

Second Year (FY2021): 270/1944 = 13.89%

The data from the state hospitals and diversion is more complete records for SFY21 which increased our ability to match records to encounters data and therefore our data is more accurate.

Priority #: 7

Priority Area: Pregnant Women and Women with Dependent Children receive treatment that targets the PWWDC population

Priority Type: SAT

Population(s): PWWDC

Goal of the priority area:

Ensure that pregnant women and women with dependent children have access to specialty services.

Objective:

Increase PWWDC being served by a Designated Women's Facility.

Strategies to attain the goal:

Increase DWF program information and interim services information to referral sources.
Encourage greater collaboration and sharing of program success within network of DWFs.
Increase intra-agency collaboration with other state programs for families.

**Edit Strategies to attain the objective here:
(if needed)**

Annual Performance Indicators to measure goal success

Indicator #: 1

Indicator: Number of pregnant women and women with dependent children admitted to a Designated Women's Facility (DWF)

Baseline Measurement: Proportion of total pregnant women and women with dependent children (PWWDC) served with Block Grant funds in SFY18 by designated women's facilities.

First-year target/outcome measurement: 5% increase from baseline

Second-year target/outcome measurement: 10% increase from baseline

New Second-year target/outcome measurement(if needed):

Data Source:

Administrative Services Organization (ASO) Designated Women's Facility Report

New Data Source(if needed):

Description of Data:

Designated Women's Facility Report - Summary/Total Admitted to DWF percentage to increase

New Description of Data:(if needed)

Data issues/caveats that affect outcome measures:

Kansas is developing a new substance use disorder data system. The outcomes of the data that will be collected within the system is still being determined at this time.

New Data issues/caveats that affect outcome measures:

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved *(if not achieved, explain why)*

Reason why target was not achieved, and changes proposed to meet target:

This performance indicator could not be measured due to several factors. Kansas has developed a new substance use disorder data collection system (KSURS). The first phase of the new system includes a minimal data set of required fields, primarily TEDS data. The new system includes a field indicating whether a woman is pregnant at admission; the system does not have a field to indicate women with dependent children. The new system captures data on all payor sources. There is not a field for manual entry to indicate which payor source to separate out Block Grant from other payor sources. Providers continue to update back data into KSURS also impacting the data reported.

How first year target was achieved (optional):

Second Year Target: Achieved Not Achieved *(if not achieved, explain why)*

Reason why target was not achieved, and changes proposed to meet target:

Kansas has developed a new substance use disorder data collection system (KSURS). The first phase of the new system included a minimal data set of required fields, primarily TEDS data. Through a Request for Proposal process, Kansas is working on a solution to modernize its substance use disorder data collection system. The RFP includes a comprehensive upgrade of IT systems at all four State hospitals both from the infrastructure and software perspective. The State is currently reviewing proposals. This performance indicator could not be measured due to several factors: The current system, KSURS, includes a field indicating whether a woman is pregnant at admission; the system does not have a field to indicate women with dependent children. KSURS captures data on all payor sources. There is not a field for manual entry to indicate which payor source to separate out Block Grant from other payor sources. Providers continue to update back data into KSURS also impacting the data reported.

How second year target was achieved (optional):

Priority #: 8

Priority Area: Recovery Oriented System of Care

Priority Type: SAT

Population(s): PWWDC, PWID, TB

Goal of the priority area:

Kansas Behavioral Health system supports a recovery-oriented system of care.

Objective:

More individuals have access to peer mentoring services.

Strategies to attain the goal:

Increase the peer mentoring workforce capacity.

Edit Strategies to attain the objective here: (if needed)

Annual Performance Indicators to measure goal success

Indicator #: 1

Indicator: Number of Kansas Certified Peer Mentors increase.

Baseline Measurement: Set a baseline (FY19)

First-year target/outcome measurement: Increase the percentage of Kansas Certified Peer Mentors by 10% in FY20

Second-year target/outcome measurement: Increase the percentage of Kansas Certified Peer Mentors by 10% in FY21 from FY20

New Second-year target/outcome measurement(if needed):

Data Source:

Adult Consumer Affairs tracking spreadsheet

New Data Source(if needed):

Description of Data:

Certified Peer Mentor roster

New Description of Data:(if needed)

Data issues/caveats that affect outcome measures:

Training contractor reporting timeliness and accuracy.

New Data issues/caveats that affect outcome measures:

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved (if not achieved,explain why)

Reason why target was not achieved, and changes proposed to meet target:

SFY2019 Baseline = 58 Peer Mentors certified

SFY2020 = 50 Peer Mentors certified (decrease of 13.8%)

The decrease of Peer Mentors certified is the result of the decrease of in-person trainings offered due to COVID-19 the last few months of SFY2020. KDADS is now offering the Peer Mentor Level 1 training online. KDADS is also researching options to offer the Peer Mentor Level 2 training virtually to avoid any further delays in achieving our target for FY2021.

How first year target was achieved (optional):

Second Year Target: Achieved Not Achieved (if not achieved,explain why)

Reason why target was not achieved, and changes proposed to meet target:

SFY2019 Baseline = 58 Peer Mentors certified

SFY2020 = 50 Peer Mentors certified (decrease of 13.8%)

SFY2021 = 20 Peer Mentors certified (decrease of 60%)

Due to COVID-19, in-person trainings were put on hold which decreased the number of individuals that became fully certified in FY2021. KDADS is very close to offering the training for certification virtually. KDADS has been able to offer the Level One Peer Mentor training online during FY2021 and 124 individuals completed the training. We are expecting most of those 124 individuals to apply for their certification within the current fiscal year FY2022 and that number to continue to grow and allow us to not only meet our target, but to exceed the target increase of 10%.

How second year target was achieved (optional):

Priority #: 9

Priority Area: Expand access to youth experiencing their first psychotic episode and offer treatment and support within two years of the episode.

Priority Type: MHS

Population(s): ESMI

Goal of the priority area:

Youth who have experienced their first psychotic episode are free from the adverse effects of their mental illness.

Objective:

Increase the number of youth who receive early intervention increasing their chance of successful recovery.

Strategies to attain the goal:

Identify opportunities to increase access to services for ESMI.

Examine adequacy of ESMI-related service rates.

Establish care coordination and case management requirements for our contractors that are provided through treatment and continuing care.

Identify potential partners who may have contact with young people in this age group to educate and build awareness around early intervention and treatment availability such as the Kansas Department of Children and Families, colleges, schools and social media.

**Edit Strategies to attain the objective here:
(if needed)**

Annual Performance Indicators to measure goal success

Indicator #: 1

Indicator: ESMI served with Block Grant funded intervention.

Baseline Measurement: Number of youth experiencing ESMI served with Block Grant funded intervention in SFY19.

First-year target/outcome measurement: 5% increase in number of youth experiencing ESMI served with Block Grant funded intervention in SFY20

Second-year target/outcome measurement: 5% increase in number of youth experiencing ESMI served with Block Grant funded intervention in SFY21 from number in SFY20.

New Second-year target/outcome measurement(if needed):

Data Source:

KDADS' Automated Information Management System (AIMS)

New Data Source(if needed):

Quarterly provider reports

Description of Data:

Proportion of total number of youth experiencing ESMI served with Block Grant funded intervention in a given State Fiscal Year (SFY).

New Description of Data:(if needed)

Data issues/caveats that affect outcome measures:

Individuals not correctly identified as being ESMI

New Data issues/caveats that affect outcome measures:

Report of Progress Toward Goal Attainment

First Year Target: Achieved Not Achieved *(if not achieved, explain why)*

Reason why target was not achieved, and changes proposed to meet target:

How first year target was achieved (optional):

SFY2019 Baseline: 54 youth experiencing ESMI served with Block Grant funded intervention

SFY2020: 68 youth (increase of 14 youth or 26%)

Increase can be attributed to the implementation of a new program (Four County) and increased outreach by existing programs resulting in more youth served.

Second Year Target: Achieved Not Achieved *(if not achieved, explain why)*

Reason why target was not achieved, and changes proposed to meet target:

SFY2020: 68 youth

SFY2021: 55 youth (decrease of 13 youth or 19.12%)

Decrease can be attributed to recruitment and marketing of the program to schools, agencies, and community groups was reduced due to COVID restrictions in travel and in-person meetings. There was also several staff changes at one of the programs resulting in some reduction in taking on new participants but that has now been resolved. Funding has been provided for a new program in the second largest populated county in Kansas. This new program in Johnson County will be fully established and admitting participants in the second half of FY22. This should also increase the numbers of participants served.

How second year target was achieved (optional):

0930-0168 Approved: 04/19/2019 Expires: 04/30/2022

Footnotes:

**Kansas COVID Testing and Mitigation Program Report
for the Substance Abuse Prevention and Treatment Block Grant (SABG)
for Federal Fiscal Year Ending September 30, 2021
(Due Date: December 31, 2021)**

On August 19, 2021 SAMHSA released guidance on one-time funding for awards authorized under the American Rescue Plan (ARP) Act of 2021 (P.L. 117-2) and Section 711 of the Social Security Act (42 U.S.C. 711(c)) for the targeted support necessary for mental health and substance use disorder treatment providers to overcome barriers towards achieving and maintaining high COVID-19 testing rates (commonly referred to as COVID Testing and Mitigation funds). The performance period for this funding is September 1, 2021 – September 30, 2025.

As indicated in your SABG Notice of Award of August 10, 2021, States, Territories, and the Red Lake Band of the Chippewa Indians are required to submit an annual report by December 31 of each year, until the funds expire. Grantees must upload a narrative report including activities and expenditures to Table 1 of the FY 22 Substance Abuse Block Grant Report. A revision request will be sent to grantees to upload the report.

For the Federal Fiscal Year ending September 30, 2021, please upload a Word or PDF document in Table 1 of the FY 22 SABG Report on the COVID Testing and Mitigation activities by answering the following question, due by 11:59 pm EST on December 31, 2021:

List the items and activities of expenditures completed between September 1 and September 30, 2021. (if no activities were completed, note here with Not Applicable)

SABG COVID Testing and Mitigation Program Report for 9/1/21 – 9/30/21: Kansas	
Item/Activity	Amount of Expenditure
N/A	N/A
Total	

Note: If no activities were completed, please upload the report document indicating “Not Applicable”. Per the BGAS Revision Request, SABG grantees are requested to upload an Attachment in the “FY 2022 SABG Report Submitted”, “Section II: Annual Update, Table 1 Priority Area and Annual Performance Indicators – Progress Report”.

As outlined in the table below, Kansas has completed a plan to utilize and allocate the SABG COVID-19 Testing and Mitigation Funds. Kansas recently received approval for our plan and the State is in the process of implementing but there were no funds expended by the reporting period end date of this report, September 30, 2021.

Prevention, Treatment and Recovery

Kansas Strategy	Amount
Contract with one or more community partners to implement strategies as identified by the State and the contractor; electronic marketing by the State	\$346,260
Total	\$346,260

Total SABG = \$ 346,260

III: Expenditure Reports

Table 2A - State Agency Expenditure Report

Expenditure Period Start Date: 7/1/2020 Expenditure Period End Date: 6/30/2021

Activity (See instructions for entering expenses in Row 1)	A. SA Block Grant	B. MH Block Grant	C. Medicaid (Federal, State, and Local)	D. Other Federal Funds (e.g., ACF (TANF), CDC, CMS (Medicare) SAMHSA, etc.)	E. State Funds	F. Local Funds (excluding local Medicaid)	G. Other	H. COVID -19 ¹
1. Substance Abuse Prevention ² and Treatment	\$8,995,732.00		\$14,108,057.00	\$0.00	\$10,896,489.03	\$0.00	\$1,297,324.23	\$0.00
a. Pregnant Women and Women with Dependent Children ²	\$2,050,311.00		\$812,357.77	\$0.00	\$2,852,715.00	\$0.00	\$0.00	\$0.00
b. All Other	\$6,945,421.00		\$13,295,699.23	\$0.00	\$8,043,774.03	\$0.00	\$1,297,324.23	\$0.00
2. Substance Abuse Primary Prevention	\$2,484,839.24		\$0.00	\$13,452,530.40	\$482,678.49	\$0.00	\$0.00	\$0.00
3. Tuberculosis Services	\$0.00		\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00
4. Early Intervention Services Regarding the Human Immunodeficiency Virus (EIS/HIV) ³	\$0.00		\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00
5. State Hospital								
6. Other 24 Hour Care								
7. Ambulatory/Community Non-24 Hour Care								
8. Mental Health Primary Prevention								
9. Evidenced Based Practices for First Episode Psychosis (10% of the state's total MHBG award)								
10. Administration (Excluding Program and Provider Level)	\$956,540.49		\$0.00	\$0.00	\$544,101.48	\$0.00	\$0.00	\$0.00
11. Total	\$12,437,111.73	\$0.00	\$14,108,057.00	\$13,452,530.40	\$11,923,269.00	\$0.00	\$1,297,324.23	\$0.00

¹The 24-month expenditure period for the COVID-19 Relief supplemental funding is **March 15, 2021 – March 14, 2023**, which is different from the expenditure period for the "standard" SABG and MHBG. Per the instructions, the standard SABG expenditures are for the state expenditure period of July 1, 2021 – June 30, 2023, for most states.

²Prevention other than primary prevention

³Only designated states as defined in 42 U.S.C. § 300x-24(b)(2) and 45 CFR § 96.128(b) for the applicable federal fiscal year should enter information in this row. This may include a state or states that were previously considered "designated states" during any of the three prior federal fiscal years for which a state was applying for a grant. See Els/HIV policy change in SABG Annual Report instructions.

Please indicate the expenditures are actual or estimated.

Actual Estimated

0930-0168 Approved: 04/19/2019 Expires: 04/30/2022

Footnotes:

During SFY 2021 127,036 was spent on Technical Assistance Funds. No Covid-19 funds for ARPA or Covid Relief have yet been spent in substance abuse.

III: Expenditure Reports

Table 4 - State Agency SABG Expenditure Compliance Report

This table provides a description of SABG expenditures for authorized activities to prevent and treat SUDs. For detailed instructions, refer to those in BGAS. Only one column is to be filled in each year.

Expenditure Period Start Date: 10/1/2018 Expenditure Period End Date: 9/30/2020

Expenditure Category	FY 2019 SA Block Grant Award
1. Substance Abuse Prevention ¹ and Treatment	\$8,926,412.75
2. Primary Prevention	\$2,708,888.00
3. Tuberculosis Services	\$0.00
4. Early Intervention Services Regarding the Human Immunodeficiency Virus (EIS/HIV) ²	\$0.00
5. Administration (excluding program/provider level)	\$595,015.25
Total	\$12,230,316.00

¹Prevention other than Primary Prevention

²Only designated states as defined in 42 U.S.C. § 300x-24(b)(2) and 45 CFR § 96.128(b) for the applicable federal fiscal year should enter information in this row. This may include a state or states that were previously considered “designated states” during any of the three prior federal fiscal years for which a state was applying for a grant. See EIS/HIV policy change in SABG Annual Report instructions.

0930-0168 Approved: 04/19/2019 Expires: 04/30/2022

Footnotes:
 During Award for FFY 2019 Technical assistance funds were in the amount of 328,827. That amount has been added to line #2.

III: Expenditure Reports

Table 5a - SABG Primary Prevention Expenditures Checklist

The State or jurisdiction must complete either SABG Table 5a and/or 5b. There are six primary prevention strategies typically funded by principal agencies administering the SABG. Expenditures within each of the six strategies or Institute of Medicine Model (IOM) should be directly associated with the cost of completing the activity or task. For example, information dissemination may include the cost of developing pamphlets, the time of participating staff and/or the cost of public service announcements, etc. If a state or jurisdiction employs strategies not covered by these six categories, please report them under "Other," each in a separate row.

Section 1926 – Tobacco: Costs associated with the Synar Program Pursuant to the January 19, 1996 federal regulation “Tobacco Regulation for Substance Abuse Prevention and Treatment Block Grants, Final Rule” (45 CFR § 96.130), a state may not use the SABG to fund the enforcement of its statute, except that it may expend funds from its primary prevention set aside of its Block Grant allotment under 45 CFR §96.124(b)(1) for carrying out the administrative aspects of the requirements, such as the development of the sample design and the conducting of the inspections. States should include any non-SABG funds* that were allotted for Synar activities in the appropriate columns under 7 below.

*Please list all sources, if possible (e.g., Centers for Disease Control and Prevention, Block Grant, foundations, etc.)

0930-0168 Approved: 04/19/2019 Expires: 04/30/2022

Footnotes:

Exception-5a not equal to Table 4, Row 2 due to state using a portion of the primary prevention set-aside to fund Resource Development activities.

III: Expenditure Reports

Table 5b - SABG Primary Prevention Expenditures by Institute of Medicine (IOM) Categories

The state or jurisdiction must complete SABG Table 5b if it chooses to report SUD primary prevention activities utilizing the IOM Model of Universal, Selective and Indicated. Indicate how much funding supported each of the IOM classifications of Universal, Selective, or Indicated. Include all funding sources (e.g., Centers for Disease Control and Prevention Block Grant, foundations).

Table 5c - SABG Primary Prevention Priorities and Special Population Categories

The purpose of the first table is for the state or jurisdiction to identify the substance and/or categories of substances it identified through its needs assessment and then addressed with primary prevention set-aside dollars from the FY 2019 SABG NoA. The purpose of the second table is to identify each special population the state or jurisdiction selected as a priority for primary prevention set-aside expenditures.

III: Expenditure Reports

Table 8a - Maintenance of Effort for State Expenditures for SUD Prevention and Treatment

This Maintenance of Effort table provides a description of non-federal expenditures to include funds appropriated by the state legislature; revenue funds (e.g., alcohol, tobacco, and gambling taxes; asset seizures); state Medicaid match expenditures; and third-party reimbursement (e.g., insurance payments) for authorized activities to prevent and treat SUDs flowing through the Single State Agency (SSA) during the state fiscal year immediately preceding the federal fiscal year for which the state is applying for funds.

Expenditure Period Start Date: 07/01/2020 Expenditure Period End Date: 06/30/2021

Total Single State Agency (SSA) Expenditures for Substance Abuse Prevention and Treatment		
Period (A)	Expenditures (B)	<u>B1(2019) + B2(2020)</u> 2 (C)
SFY 2019 (1)	\$15,805,371.18	
SFY 2020 (2)	\$15,198,307.00	\$15,501,839.09
SFY 2021 (3)	\$16,369,878.64	

Are the expenditure amounts reported in Column B "actual" expenditures for the State fiscal years involved?

SFY 2019 Yes X No _____
 SFY 2020 Yes X No _____
 SFY 2021 Yes X No _____

Did the state or jurisdiction have any **non-recurring expenditures** as described in 42 U.S.C. § 300x-30(b) for a specific purpose which were not included in the MOE calculation?

Yes _____ No X

If yes, specify the amount and the State fiscal year: _____

If yes, SFY: _____

Did the state or jurisdiction include these funds in previous year MOE calculations?

Yes _____ No _____

When did the State or Jurisdiction submit an official request to SAMHSA to exclude these funds from the MOE calculations? _____

If estimated expenditures are provided, please indicate when actual expenditure data will be submitted to SAMHSA: _____

Please provide a description of the amounts and methods used to calculate the total Single State Agency (SSA) expenditures for substance use disorder prevention and treatment 42 U.S.C. §300x-30.

Numbers are based on State budget year SMART actuals and Medicaid encounter data.

COVID 19 continued to impact utilization during this time period. Impacts include court closures resulting in reduced number of referrals, facility closures for cleaning due to staff or patient illness, residential centers reducing people to one per room versus two to accommodate social distancing, and workforce shortages. Further, Kansas has a new substance use disorder treatment data collection system (KSURS). Providers continue to update back data into KSURS impacting the data reported.

Table 11B - Kansas has completed a plan to utilize and allocate the COVID-19 funds, however, there were not any funds expended prior to June 30, 2021.

Table 11C - Per a notification by SAMHSA received on 11/2/21, CSAT and DSCA leadership have approved an immediate change in the FY 22 SABG Report that is scheduled for submission to CSAT on December 1, 2021. The FY 22 SABG Report Tables 11A and 11B are required, while Table 11C is requested only.

Please note that Kansas does not currently collect sexual orientation and gender identity information in our State system (KSURS), therefore, the State is not able to complete Table 11C.

IV: Population and Services Reports

Table 12 - SABG Early Intervention Services Regarding the Human Immunodeficiency Virus (EIS/HIV) in Designated States

Expenditure Period Start Date: 7/1/2020 Expenditure Period End Date: 6/30/2021

Early Intervention Services for Human Immunodeficiency Virus (HIV)		
1. Number of SAPT HIV EIS programs funded in the State	Statewide: _____	Rural: _____
2. Total number of individuals tested through SAPT HIV EIS funded programs		
3. Total number of HIV tests conducted with SAPT HIV EIS funds		
4. Total number of tests that were positive for HIV		
5. Total number of individuals who prior to the 12-month reporting period were unaware of their HIV infection		
6. Total number of HIV-infected individuals who were diagnosed and referred into treatment and care during the 12-month reporting period		
Identify barriers, including State laws and regulations, that exist in carrying out HIV testing services:		

0930-0168 Approved: 04/19/2019 Expires: 04/30/2022

Footnotes:

Not Applicable - Kansas is not a HIV designated or previously designated state.

IV: Population and Services Reports

Table 13 - Charitable Choice

Under Charitable Choice Provisions; Final Rule (42 CFR Part 54), states, local governments, and religious organizations, such as SAMHSA grant recipients, must: (1) ensure that religious organizations that are providers provide to all potential and actual program beneficiaries (services recipients) notice of their right to alternative services; (2) ensure that religious organizations that are providers refer program beneficiaries to alternative services; and (3) fund and/or provide alternative services. The term "alternative services" means services determined by the state to be accessible and comparable and provided within a reasonable period of time from another substance abuse provider ("alternative provider") to which the program beneficiary (services recipient) has no religious objection. The purpose of this table is to document how the state is complying with these provisions.

Expenditure Period Start Date: 7/1/2020 Expenditure Period End Date: 6/30/2021

Notice to Program Beneficiaries - Check all that apply:

- Used model notice provided in final regulation.
- Used notice developed by State (please attach a copy to the Report).
- State has disseminated notice to religious organizations that are providers.
- State requires these religious organizations to give notice to all potential beneficiaries.

Referrals to Alternative Services - Check all that apply:

- State has developed specific referral system for this requirement.
- State has incorporated this requirement into existing referral system(s).
- SAMHSA's Behavioral Health Treatment Locator is used to help identify providers.
- Other networks and information systems are used to help identify providers.
- State maintains record of referrals made by religious organizations that are providers.

0 Enter the total number of referrals to other substance abuse providers ("alternative providers") necessitated by religious objection, as defined above, made during the State fiscal year immediately preceding the federal fiscal year for which the state is applying for funds. Provide the total only. No information on specific referrals is required. If no alternative referrals were made, enter zero.

Provide a brief description (one paragraph) of any training for local governments and/or faith-based and/or community organizations that are providers on these requirements.

KDADS is currently not providing training on charitable choice, but policy BG 405 titled "Charitable Choice Programs" can be found on the KDADS website at the following link: https://www.kdads.ks.gov/docs/default-source/CSP/bhs-documents/policies_regulations/charitable-choice-programs---bg405.pdf?sfvrsn=62ef30ee_0. There is a section in the Administrative Services Organization (Beacon Health Options) Kansas Block Grant Provider Addendum on Charitable Choice requirements. This section states that faith based providers shall have members admitted to their facility sign an agreement stating they understand the Charitable Choice requirements and the document shall be placed in the member's clinical record. In the Provider Information page of the ASO's website under the Education section, there is also a Substance Abuse Prevention and Treatment Block Grant Overview Powerpoint that includes the Charitable Choice requirements (45 CFR Part 54a) slides 102-105.

0930-0168 Approved: 04/19/2019 Expires: 04/30/2022

Footnotes:

COVID 19 continued to impact utilization during this time period. Impacts include court closures resulting in reduced number of referrals, facility closures for cleaning due to staff or patient illness, residential centers reducing people to one per room versus two to accommodate social distancing, and workforce shortages.

Kansas implemented a new substance use disorder treatment data collection system (KSURS) in October 2019. The first phase of the new system included a minimal data set of required fields, primarily TEDS data. Data Integrity edits were added to the new system as needed to reduce or eliminate data entry errors, however, KSURS was created to be entered manually without an internal mechanism to check the admission and discharge dates for correct entry into the database. This can create duplications, inaccuracy of dates or longer than usual discharges in the system. Further, Providers continue to update back data into KSURS impacting the data reported to SAMHSA for Tables 14 - 20. Through a Request for Proposal process, Kansas is working on a solution to modernize its substance use disorder data collection system. The RFP includes a comprehensive upgrade of IT systems at all four State hospitals both from the infrastructure and software perspective. The State is currently reviewing proposals.

V: Performance Indicators and Accomplishments

Table 15 - Treatment Performance Measure Stability of Housing (From Admission to Discharge)

Short-term Residential(SR)

Clients living in a stable living situation (prior 30 days) at admission vs. discharge

	At Admission (T1)	At Discharge (T2)
Number of clients living in a stable situation [numerator]	237	290
Total number of clients with non-missing values on living arrangements [denominator]	310	310
Percent of clients in stable living situation	76.5 %	93.5 %
Notes (for this level of care):		
Number of CY 2020 admissions submitted:		2,116
Number of CY 2020 discharges submitted:		742
Number of CY 2020 discharges linked to an admission:		360
Number of linked discharges after exclusions (excludes: detox, hospital inpatient, opioid replacement clients; deaths; incarcerated):		357
Number of CY 2020 linked discharges eligible for this calculation (non-missing values):		310

Source: SAMHSA/CBHSQ TEDS CY 2020 admissions file and CY 2020 linked discharge file
[Records received through 2/1/2022]

Long-term Residential(LR)

Clients living in a stable living situation (prior 30 days) at admission vs. discharge

	At Admission (T1)	At Discharge (T2)
Number of clients living in a stable situation [numerator]	45	54
Total number of clients with non-missing values on living arrangements [denominator]	60	60
Percent of clients in stable living situation	75.0 %	90.0 %
Notes (for this level of care):		
Number of CY 2020 admissions submitted:		282
Number of CY 2020 discharges submitted:		156
Number of CY 2020 discharges linked to an admission:		92
Number of linked discharges after exclusions (excludes: detox, hospital inpatient, opioid replacement clients; deaths; incarcerated):		90
Number of CY 2020 linked discharges eligible for this calculation (non-missing values):		60

Outpatient (OP)

Clients living in a stable living situation (prior 30 days) at admission vs. discharge

	At Admission (T1)	At Discharge (T2)
Number of clients living in a stable situation [numerator]	899	906
Total number of clients with non-missing values on living arrangements [denominator]	926	926
Percent of clients in stable living situation	97.1 %	97.8 %
Notes (for this level of care):		
Number of CY 2020 admissions submitted:		6,023
Number of CY 2020 discharges submitted:		3,062
Number of CY 2020 discharges linked to an admission:		1,634
Number of linked discharges after exclusions (excludes: detox, hospital inpatient, opioid replacement clients; deaths; incarcerated):		1,529
Number of CY 2020 linked discharges eligible for this calculation (non-missing values):		926

Intensive Outpatient (IO)

Clients living in a stable living situation (prior 30 days) at admission vs. discharge

	At Admission (T1)	At Discharge (T2)
Number of clients living in a stable situation [numerator]	112	113
Total number of clients with non-missing values on living arrangements [denominator]	122	122
Percent of clients in stable living situation	91.8 %	92.6 %
Notes (for this level of care):		
Number of CY 2020 admissions submitted:		854
Number of CY 2020 discharges submitted:		383
Number of CY 2020 discharges linked to an admission:		191
Number of linked discharges after exclusions (excludes: detox, hospital inpatient, opioid replacement clients; deaths; incarcerated):		172
Number of CY 2020 linked discharges eligible for this calculation (non-missing values):		122

Footnotes:

COVID 19 continued to impact utilization during this time period. Impacts include court closures resulting in reduced number of referrals, facility closures for cleaning due to staff or patient illness, residential centers reducing people to one per room versus two to accommodate social distancing, and workforce shortages.

Kansas implemented a new substance use disorder treatment data collection system (KSURS) in October 2019. The first phase of the new system included a minimal data set of required fields, primarily TEDS data. Data Integrity edits were added to the new system as needed to reduce or eliminate data entry errors, however, KSURS was created to be entered manually without an internal mechanism to check the admission and discharge dates for correct entry into the database. This can create duplications, inaccuracy of dates or longer than usual discharges in the system. Further, Providers continue to update back data into KSURS impacting the data reported to SAMHSA for Tables 14 - 20. Through a Request for Proposal process, Kansas is working on a solution to modernize its substance use disorder data collection system. The RFP includes a comprehensive upgrade of IT systems at all four State hospitals both from the infrastructure and software perspective. The State is currently reviewing proposals.

V: Performance Indicators and Accomplishments

Table 16 - Treatment Performance Measure Criminal Justice Involvement (From Admission to Discharge)

Short-term Residential(SR)

Clients without arrests (any charge) (prior 30 days) at admission vs. discharge

	At Admission(T1)	At Discharge(T2)
Number of Clients without arrests [numerator]	257	289
Total number of Admission and Discharge clients with non-missing values on arrests [denominator]	302	302
Percent of clients without arrests	85.1 %	95.7 %
Notes (for this level of care):		
Number of CY 2020 admissions submitted:		2,116
Number of CY 2020 discharges submitted:		742
Number of CY 2020 discharges linked to an admission:		360

V: Performance Indicators and Accomplishments

Table 17 - Treatment Performance Measure Change in Abstinence - Alcohol Use (From Admission to Discharge)

Short-term Residential(SR)

A. ALCOHOL ABSTINENCE AMONG ALL CLIENTS – CHANGE IN ABSTINENCE (From Admission to Discharge)

Alcohol Abstinence – Clients with no alcohol use at admission vs. discharge, as a percent of all clients (regardless of primary problem)

	At Admission(T1)	At Discharge(T2)
Number of clients abstinent from alcohol [numerator]	146	212
All clients with non-missing values on at least one substance/frequency of use [denominator]	213	213
Percent of clients abstinent from alcohol	68.5 %	99.5 %

B. ALCOHOL ABSTINENCE AT DISCHARGE, AMONG ALCOHOL USERS AT ADMISSION

Clients abstinent from alcohol at discharge among clients using alcohol at admission (regardless of primary problem)

	At Admission(T1)	At Discharge(T2)
Number of clients abstinent from alcohol at discharge among clients using alcohol at admission [numerator]		66
Number of clients using alcohol at admission (records with at least one substance/frequency of use at admission and discharge [denominator]	67	
Percent of clients abstinent from alcohol at discharge among clients using alcohol at admission [#T2 / #T1 x 100]		98.5 %

C. ALCOHOL ABSTINENCE AT DISCHARGE, AMONG ALCOHOL ABSTINENT AT ADMISSION

Clients abstinent from alcohol at discharge among clients abstinent from alcohol at admission (regardless of primary problem)

	At Admission(T1)	At Discharge(T2)
Number of clients abstinent from alcohol at discharge among clients abstinent from alcohol at admission [numerator]		146
Number of clients abstinent from alcohol at admission (records with at least one substance/frequency of use at admission and discharge [denominator]	146	
Percent of clients abstinent from alcohol at discharge among clients abstinent from alcohol at admission [#T2 / #T1 x 100]		100.0 %

Notes (for this level of care):

Footnotes:

COVID 19 continued to impact utilization during this time period. Impacts include court closures resulting in reduced number of referrals, facility closures for cleaning due to staff or patient illness, residential centers reducing people to one per room versus two to accommodate social distancing, and workforce shortages.

Kansas implemented a new substance use disorder treatment data collection system (KSURS) in October 2019. The first phase of the new system included a minimal data set of required fields, primarily TEDS data. Data Integrity edits were added to the new system as needed to

reduce or eliminate data entry errors, however, KSURS was created to be entered manually without an internal mechanism to check the admission and discharge dates for correct entry into the database. This can create duplications, inaccuracy of dates or longer than usual discharges in the system. Further, Providers continue to update back data into KSURS impacting the data reported to SAMHSA for Tables 14 - 20. Through a Request for Proposal process, Kansas is working on a solution to modernize its substance use disorder data collection system. The RFP includes a comprehensive upgrade of IT systems at all four State hospitals both from the infrastructure and software perspective. The State is currently reviewing proposals.

V: Performance Indicators and Accomplishments

Table 19 - Treatment Performance Measure Change in Social Support Of Recovery (From Admission to Discharge)

Short-term Residential(SR)

Social Support of Recovery - Clients participating in self-help groups (e.g., AA, NA, etc.) (prior 30 days) at admission vs. discharge

	At Admission (T1)	At Discharge (T2)
Number of clients participating in self-help groups (AA NA meetings attended, etc.) [numerator]	8	206
Total number of Admission and Discharge clients with non-missing values on participation in self-help groups [denominator]	240	240
Percent of clients participating in self-help groups	3.3 %	85.8 %
Percent of clients with participation in self-help groups at discharge minus percent of clients with self-help attendance at admission Absolute Change [%T2-%T1]	82.5 %	
Notes (for this level of care):		
Number of CY 2020 admissions submitted:		2,116
Number of CY 2020 discharges submitted:		742
Number of CY 2020 discharges linked to an admission:		360
Number of linked discharges after exclusions (excludes: detox, hospital inpatient, opioid replacement clients; deaths; incarcerated):		358
Number of CY 2020 linked discharges eligible for this calculation (non-missing values):		240

Source: SAMHSA/CBHSQ TEDS CY 2020 admissions file and CY 2020 linked discharge file
[Records received through 2/1/2022]

Long-term Residential(LR)

Social Support of Recovery - Clients participating in self-help groups (e.g., AA, NA, etc.) (prior 30 days) at admission vs. discharge

	At Admission (T1)	At Discharge (T2)
Number of clients participating in self-help groups (AA NA meetings attended, etc.) [numerator]	75	81
Total number of Admission and Discharge clients with non-missing values on participation in self-help groups [denominator]	87	87
Percent of clients participating in self-help groups	86.2 %	93.1 %
Percent of clients with participation in self-help groups at discharge minus percent of clients with self-help attendance at admission Absolute Change [%T2-%T1]	6.9 %	
Notes (for this level of care):		
Number of CY 2020 admissions submitted:		282
Number of CY 2020 discharges submitted:		156

Number of CY 2020 discharges linked to an admission:	92
Number of linked discharges after exclusions (excludes: detox, hospital inpatient, opioid replacement clients; deaths; incarcerated):	91
Number of CY 2020 linked discharges eligible for this calculation (non-missing values):	87

Source: SAMHSA/CBHSQ TEDS CY 2020 admissions file and CY 2020 linked discharge file
[Records received through 2/1/2022]

Outpatient (OP)

Social Support of Recovery - Clients participating in self-help groups (e.g., AA, NA, etc.) (prior 30 days) at admission vs. discharge

	At Admission (T1)	At Discharge (T2)
Number of clients participating in self-help groups (AA NA meetings attended, etc.) [numerator]	188	342
Total number of Admission and Discharge clients with non-missing values on participation in self-help groups [denominator]	944	944
Percent of clients participating in self-help groups	19.9 %	36.2 %
Percent of clients with participation in self-help groups at discharge minus percent of clients with self-help attendance at admission Absolute Change [%T2-%T1]	16.3 %	

Notes (for this level of care):

Number of CY 2020 admissions submitted:	6,023
Number of CY 2020 discharges submitted:	3,062
Number of CY 2020 discharges linked to an admission:	1,634
Number of linked discharges after exclusions (excludes: detox, hospital inpatient, opioid replacement clients; deaths; incarcerated):	1,604
Number of CY 2020 linked discharges eligible for this calculation (non-missing values):	944

Source: SAMHSA/CBHSQ TEDS CY 2020 admissions file and CY 2020 linked discharge file
[Records received through 2/1/2022]

Intensive Outpatient (IO)

Social Support of Recovery - Clients participating in self-help groups (e.g., AA, NA, etc.) (prior 30 days) at admission vs. discharge

	At Admission (T1)	At Discharge (T2)
Number of clients participating in self-help groups (AA NA meetings attended, etc.) [numerator]	34	48
Total number of Admission and Discharge clients with non-missing values on participation in self-help groups [denominator]	118	118
Percent of clients participating in self-help groups	28.8 %	40.7 %
Percent of clients with participation in self-help groups at discharge minus percent of clients with self-help attendance at admission Absolute Change [%T2-%T1]	11.9 %	

Notes (for this level of care):

Number of CY 2020 admissions submitted:	854
---	-----

Number of CY 2020 discharges submitted:	383
Number of CY 2020 discharges linked to an admission:	191
Number of linked discharges after exclusions (excludes: detox, hospital inpatient, opioid replacement clients; deaths; incarcerated):	185
Number of CY 2020 linked discharges eligible for this calculation (non-missing values):	118

Source: SAMHSA/CBHSQ TEDS CY 2020 admissions file and CY 2020 linked discharge file

V: Performance Indicators and Accomplishments

TABLE 21 - SUBSTANCE ABUSE PREVENTION NOMS DOMAIN: REDUCED MORBIDITY - ABSTINENCE FROM DRUG USE/ALCOHOL USE MEASURE: 30-DAY USE

A. Measure	B. Question/Response	C. Pre-populated Data	D. Approved Substitute Data
1. 30-day Alcohol Use	<p>Source Survey Item: NSDUH Questionnaire. "Think specifically about the past 30 days, that is, from [DATEFILL] through today. During the past 30 days, on how many days did you drink one or more drinks of an alcoholic beverage?[Response option: Write in a number between 0 and 30.]</p> <p>Outcome Reported: Percent who reported having used alcohol during the past 30 days.</p>		
	Age 12 - 20 - CY 2019 - 2020	20.7	16.4
	Age 21+ - CY 2019 - 2020	57.9	
2. 30-day Cigarette Use	<p>Source Survey Item: NSDUH Questionnaire: "During the past 30 days, that is, since [DATEFILL], on how many days did you smoke part or all of a cigarette?[Response option: Write in a number between 0 and 30.]</p> <p>Outcome Reported: Percent who reported having smoked a cigarette during the past 30 days.</p>		
	Age 12 - 17 - CY 2019 - 2020	2.3	6.4
	Age 18+ - CY 2019 - 2020	18.9	
3. 30-day Use of Other Tobacco Products	<p>Survey Item: NSDUH Questionnaire: "During the past 30 days, that is, since [DATEFILL], on how many days did you use [other tobacco products]^[1]?[Response option: Write in a number between 0 and 30.]</p> <p>Outcome Reported: Percent who reported having used a tobacco product other than cigarettes during the past 30 days, calculated by combining responses to questions about individual tobacco products (cigars, smokeless tobacco, pipe tobacco).</p>		
	Age 12 - 17 - CY 2019 - 2020	2.3	
	Age 18+ - CY 2019 - 2020	10.2	
4. 30-day Use of Marijuana	<p>Source Survey Item: NSDUH Questionnaire: "Think specifically about the past 30 days, from [DATEFILL] up to and including today. During the past 30 days, on how many days did you use marijuana or hashish?[Response option: Write in a number between 0 and 30.]</p> <p>Outcome Reported: Percent who reported having used marijuana or hashish during the past 30 days.</p>		
	Age 12 - 17 - CY 2019 - 2020	6.0	13.8
	Age 18+ - CY 2019 - 2020	11.4	
5. 30-day Use of Illegal Drugs Other Than Marijuana	<p>Source Survey Item: NSDUH Questionnaire: "Think specifically about the past 30 days, from [DATEFILL] up to and including today. During the past 30 days, on how many days did you use [any other illegal drug]^[2]</p> <p>Outcome Reported: Percent who reported having used illegal drugs other than marijuana or hashish during the past 30 days, calculated by combining responses to questions about individual drugs (heroin, cocaine, hallucinogens, inhalants, methamphetamine, and misuse of prescription drugs).</p>		
	Age 12 - 17 - CY 2019 - 2020	1.9	

[1]NSDUH asks separate questions for each tobacco product. The number provided combines responses to all questions about tobacco products other than cigarettes.

[2]NSDUH asks separate questions for each illegal drug. The number provided combines responses to all questions about illegal drugs other than marijuana or hashish.

V: Performance Indicators and Accomplishments

Table 23 - SUBSTANCE ABUSE PREVENTION NOMS DOMAIN: REDUCED MORBIDITY-ABSTINENCE FROM DRUG USE/ALCOHOL USE; MEASURE: AGE OF FIRST USE

A. Measure	B. Question/Response	C. Pre-populated Data	D. Approved Substitute Data
1. Age at First Use of Alcohol	<p>Source Survey Item: NSDUH Questionnaire: "Think about the first time you had a drink of an alcoholic beverage. How old were you the first time you had a drink of an alcoholic beverage? Please do not include any time when you only had a sip or two from a drink. [Response option: Write in age at first use.]</p> <p>Outcome Reported: Average age at first use of alcohol.</p>		
	Age 12 - 20 - CY 2019 - 2020		13.3
	Age 21+ - CY 2019 - 2020		
2. Age at First Use of Cigarettes	<p>Source Survey Item: NSDUH Questionnaire: "How old were you the first time you smoked part or all of a cigarette?[Response option: Write in age at first use.]</p> <p>Outcome Reported: Average age at first use of cigarettes.</p>		
	Age 12 - 17 - CY 2019 - 2020	13.3	13.0
	Age 18+ - CY 2019 - 2020	16.6	
3. Age at First Use of Tobacco Products Other Than Cigarettes	<p>Source Survey Item: NSDUH Questionnaire: "How old were you the first time you used [any other tobacco product]^[1]?[Response option: Write in age at first use.]</p> <p>Outcome Reported: Average age at first use of tobacco products other than cigarettes.</p>		
	Age 12 - 17 - CY 2019 - 2020	13.7	
	Age 18+ - CY 2019 - 2020	19.6	
4. Age at First Use of Marijuana or Hashish	<p>Source Survey Item: NSDUH Questionnaire: "How old were you the first time you used marijuana or hashish?[Response option: Write in age at first use.]</p> <p>Outcome Reported: Average age at first use of marijuana or hashish.</p>		
	Age 12 - 17 - CY 2019 - 2020	13.4	14.1
	Age 18+ - CY 2019 - 2020	18.6	
5. Age at First Use Heroin	<p>Source Survey Item: NSDUH Questionnaire: "How old were you the first time you used heroin? [Response option: Write in age at first use.]</p> <p>Outcome Reported: Average age at first use of heroin.</p>		
	Age 12 - 17 - CY 2019 - 2020		
	Age 18+ - CY 2019 - 2020	23.7	
6. Age at First Misuse of Prescription Pain Relievers Among Past Year Initiates	<p>Source Survey Item: NSDUH Questionnaire: "How old were you the first time you used [specific pain reliever]^[2] in a way a doctor did not direct you to use it?"[Response option: Write in age at first use.]</p> <p>Outcome Reported: Average age at first misuse of prescription pain relievers among those who first misused prescription pain relievers in the last 12 months.</p>		

	Age 12 - 17 - CY 2019 - 2020		
	Age 18+ - CY 2019 - 2020		

[1]The question was asked about each tobacco product separately, and the youngest age at first use was taken as the measure.

[2]The question was asked about each drug in this category separately, and the youngest age at first use was taken as the measure.

V: Performance Indicators and Accomplishments

Table 29 - SUBSTANCE ABUSE PREVENTION NOMS DOMAIN: SOCIAL CONNECTEDNESS; MEASURE: FAMILY COMMUNICATIONS AROUND DRUG AND ALCOHOL USE

A. Measure	B. Question/Response	C. Pre-populated Data	D. Approved Substitute Data
1. Family Communications Around Drug and Alcohol Use (Youth)	<p>Source Survey Item: NSDUH Questionnaire: "Now think about the past 12 months, that is, from [DATEFILL] through today. During the past 12 months, have you talked with at least one of your parents about the dangers of tobacco, alcohol, or drug use? By parents, we mean either your biological parents, adoptive parents, stepparents, or adult guardians, whether or not they live with you.?[Response options: Yes, No]"</p> <p>Outcome Reported: Percent reporting having talked with a parent.</p>		
	Age 12 - 17 - CY 2019 - 2020	61.0	48.2
2. Family Communications Around Drug and Alcohol Use (Parents of children aged 12-17)	<p>Source Survey Item: NSDUH Questionnaire: "During the past 12 months, how many times have you talked with your child about the dangers or problems associated with the use of tobacco, alcohol, or other drugs?^[1][Response options: 0 times, 1 to 2 times, a few times, many times]"</p> <p>Outcome Reported: Percent of parents reporting that they have talked to their child.</p>		
	Age 18+ - CY 2019 - 2020	88.9	

[1]NSDUH does not ask this question of all sampled parents. It is a validation question posed to parents of 12- to 17-year-old survey respondents. Therefore, the responses are not representative of the population of parents in a State. The sample sizes are often too small for valid reporting.

0930-0168 Approved: 04/19/2019 Expires: 04/30/2022

General Questions Regarding Prevention NOMS Reporting

Question 1: Describe the data collection system you used to collect the NOMs data (e.g., MDS, DbB, KIT Solutions, manual process).

Data for Table 31 typically reflect Community Check Box (CCB) participant description entries for two CSAP strategies: Prevention Education and Problem Identification and Referral. Coalition members enter accomplishments and activities into the CCB each month, including NOMS related information. For this reporting period, number served and self-reported demographic breakdown comes directly from the CCB entries.

Question 2: Describe how your State's data collection and reporting processes record a participant's race, specifically for participants who are more than one race.

Indicate whether the State added those participants to the number for each applicable racial category or whether the State added all those participants to the More Than One Race subcategory.

There were 1025 individuals served through individual-based prevention programs and strategies. Participants who reported more than one race were included in the "more than one race" subcategory only.

Table 34 - Substance Abuse Prevention - Evidence-Based Programs and Strategies by Type of Intervention

Definition of Evidence-Based Programs and Strategies: The guidance document for the Strategic Prevention Framework State Incentive Grant, **Identifying and Selecting Evidence-based Interventions**, provides the following definition for evidence-based programs:

- Inclusion in a Federal List or Registry of evidence-based interventions
- Being reported (with positive effects) in a peer-reviewed journal
- Documentation of effectiveness based on the following guidelines:
 - Guideline 1:
The intervention is based on a theory of change that is documented in a clear logic or conceptual model; and
 - Guideline 2:
The intervention is similar in content and structure to interventions that appear in registries and/or the peer-reviewed literature; and
 - Guideline 3:
The intervention is supported by documentation that it has been effectively implemented in the past, and multiple times, in a manner attentive to Identifying and Selecting Evidence-Based Interventions scientific standards of evidence and with results that show a consistent pattern of credible and positive effects; and
 - Guideline 4:
The intervention is reviewed and deemed appropriate by a panel of informed prevention experts that includes: well-qualified prevention researchers who are experienced in evaluating prevention interventions similar to those under review; local prevention practitioners; and key community leaders as appropriate, e.g., officials from law enforcement and education sectors or elders within indigenous cultures.

1. Describe the process the State will use to implement the guidelines included in the above definition.

All prevention programs funded by SAPT Block Grant meet or exceed best practices based upon the definition provided above. This information is disseminated to prevention coalitions each year and prior to implementation all strategies must be approved by State Staff.

2. Describe how the State collected data on the number of programs and strategies. What is the source of the data?

The SAPT BG Prevention Infrastructure is required to seek program approval as well as document the programs and strategies they implement in communities. Data are collected from implementation reports, pre post evaluation documents, and the Community Check Box online monitoring and evaluation system to determine number of funded strategies.

Sherman "Wes" Cole, Chairperson
Ric Dalke, Vice Chairperson

GOVERNOR LAURA Kelly

November 17, 2021

To Whom It May Concern,

During the past year, the Kansas Governor's Behavioral Health Service Planning Council (GBHSPC) has continued to focus on ensuring that Behavioral Health Services are integrated and meet the needs of Kansas children, adults, and their families who are experiencing mental health, addictions, and co-occurring disorders. GBHSPC members continue to participate in subcommittees and task forces. Currently, the GBHSPC has ten active subcommittees. The subcommittees are: Housing and Homelessness, Justice Involved Youth and Adults, Supportive Employment and Vocational Services, Prevention, Children's, Rural and Frontier, Service Members Veterans and Families, Problem Gambling, Evidence Based Practices and the Kansas Citizen's Committee on Alcohol and Drugs (KCC). The KCC is a unique subcommittee in that it is established under its own Kansas statute with the purpose to review the substance use disorders service system in Kansas and advise the Secretary on issues and needs for services. The GBHSPC also plans to establish two additional subcommittees including one on Peer Support Services in early 2022. This Subcommittees' membership will primarily be filled by persons with lived experience who are engaged in providing peer services across Kansas. The other will be on Aging Populations and will be developed later in the year.

Each of the Subcommittees provided their yearly reports and recommendation to the Secretary and Leadership team of the Kansas Department for Aging and Disability Services and the reports are now available on the Behavioral Health Commission Website.

The reports from FY 2020 from the subcommittees have served as a vital source of information and for the development of recommendations for several special government taskforces in the past year. The reports were utilized by the Kansas Legislature's Mental Health Modernization legislative committee for development of a ten-year planning recommendation to the legislature. This legislative committee resumed again this year and requested that the FY 2021 reports from the GBHSPC subcommittee will be submitted to the committee for review and recommendations in this ongoing process in the 2022 legislative session.

This letter is confirmation that the Kansas FY2022 Substance Abuse Prevention and Treatment Block Grant report and the FY2022 Mental Health Block Grant report have both been reviewed and approved by the Kansas Governor's Behavioral Health Service Planning Council (GBHSPC).

Sincerely,

A handwritten signature in black ink that reads "Sherman Wes Cole". The signature is written in a cursive style with a large, stylized "S" and "C".

Sherman Wes Cole
Chair, Governor's Behavioral Health Services Planning Council
